Gone But Not

Magazine Covers

Here they are in all their glory. Every issue of DREAMCAST MAGAZINE from start to finish. We were the first Dreamcast magazine, we were the best Dreamcast magazine, and in the end we were the only Dreamcast magazine left (possibly the only one left in the world!) It was often lonely at the top, but the view was always great!

Issue 1 - Soul Calibur

We kicked the ball up with an exclusive first look at what turned out to be the best beat-'em-up of all time. If that wasn't enough we reviewed early classics like *Sonic Adventure*, *Ready 2 Rumble*, *Virtua Fighter 3tb* and *SEGA Rally 2*. Dreamcast was up and running, and so were we.

Issue 2 - Shadowman

A bit of a death theme to our second issue, *Shadowman*, *Resident Evil* and *The House Of The Dead* showed their rotting, but still beautiful faces. The reviews were a bit ugly, though: *Toy Commander*, *Speed Devils*, *Blue Stinger* and a wealth of other trash staggered out after the incredible launch line-up.

Forgotten

We've lost that lovin' feeling, whoa-ho that lovin' feeling, now it's gone, gone, gone...

It began as a dream. It ended up as a nightmare. We had good times, very good times, but also bad times and we've watched with horror as our little white baby was flattened by Sony's soul-crushing console. Come with us as we take a wander down memory lane...

So now, the end is near, and so we raise the final curtain. The Dreamcast console, SEGA as a console manufacturer, and DREAMCAST MAGAZINE have all finally reached the end of the line. But whilst we sob into our hands, curled and scarred from years of clutching Dreamcast pads; eyes, formally rose-tinted, now red-rimmed from stinging tears and with murderous hatred of Sony Corp in our hearts, it's time to take a look back at the beloved life of our favourite console and the company that made it.

It was 1998 when SEGA finally launched its new console to the Japanese public, a good 18 months before Sony followed suit with its PlayStation2. It had specs that blew away the ageing

PlayStation and N64 consoles and it would, on the surface, appear that everything was going to be rosy for SEGA. Everything looked bright, but this was far from the truth. In order to truly understand Dreamcast, you must first understand the SEGA Saturn, and indeed, even the SEGA MegaDrive.

Mega Success

After an initial flop with the SEGA Master System (which did relatively well in the UK, - but then Nintendo was so busy selling NES systems to every man, woman, and child in Japan and America) SEGA fought back with the SEGA MegaDrive system. Arriving a good two years before Nintendo had managed to bring out the SNES, it boasted arcade-perfect reproductions of (then) up-to-date SEGA classics such as Golden Axe.

The MegaDrive was an instant hit with a public growing tired of the ageing NES, it grabbed market share away from a startled Nintendo, who until then were

content to sell NES systems forever and had to quickly develop a new system, the SNES! SEGA taught a tired market a new mantra: Update or die out! No longer would it be enough just to make one console to sell forever, now you would have to continually push the envelope of technology to feed to the tech-hungry masses.

Sadly, such lessons were applied badly by SEGA. Following several years of success with the MegaDrive, SEGA attempted to upgrade the system via a baffling array of new boxes to slot into

Putting Her Online

In retrospect, it's easy to claim that the market wasn't ready for online gaming. Indeed, many punters are claiming that the market still isn't ready, and that Xbox has backed the wrong horse by including Broadband.

Certainly the technology used in Dreamcast didn't set the world on fire. It hardly worked at first, and it was a good year before any real online game appeared for the machine. And even then it was simplistic puzzler Chu Chu Rocket.

But online gaming came together at the end and the seminal work of art, *Phantasy Star Online*, showed the world that we can all play together. Even if we are all sitting alone in our bedrooms.

Issue 3 - Shenmue
That's more like it! Our first look at the boldest game in development, Shenmue. My God, was that really all the way back in Christmas 1999! It was, to be truthful, a fair old wait for the game to come out, but in the meantime we had SEGA Bass Fishing and NFL Blitz to play. So we didn't mind too much.

Issue 4 - Crazy Taxi
We couldn't decide what was better - the most amazing looking game ever, or the first online game. So we went with both games on the cover. Highlight of this month was Gran Turismo 2 coming in to the office on the PlayStation and everybody ignoring it to marvel at Crazy Taxi.

the system. First off the block was a Mega-CD unit – yours for only £170 pounds! Attach this baby to the bottom of the machine and say goodbye to the space limitations of cartridge technology. One of the first games we remembered seeing on this machine was the new *Virtua Racing*. It looked fantastic! So far, so good. Except then the cartridge versions came out and looked identical. Not so good after all.

"All this may sound like a string of disasters, but every rose has its thorn, just as every night has its dawn..."

The problem was that the MegaDrive simply didn't need the 80Mb of space afforded on a CD – with sprite technology still standard, 3D graphics in their infancy and gamers used to relatively simple arcade games, there was simply nothing to fill the space with. The only thing big enough at the time was FMV. The result was a slew of simplistic arcade games, coupled with masses of Manga-style FMV. Great for Anime fans, but an expensive waste of time for your average gamer.

Turbo Boost

SEGA then set out to remedy the situation by boosting the power of the MegaDrive itself, via an add-on known as the 32x. Slotting in the top of the machine, this upgraded the MegaDrive itself and was designed to fight off the impending wave of next-generation systems such as Sony's newly announced PlayStation.

Can you say "Chaos Reigned Supreme"? In a big booming voice? Imagine a machine made out of three separate parts. Regular games on cartridge or CD mixed up with 32x advanced games on cartridge or CD all sitting alongside one another on the shelf, and all competing with each other for a slightly bemused and confused customer's attention.

The result was obvious. The average customer paid not a jot of attention to either add-on and carried on buying regular games for their regular MegaDrive system. SEGA had taught the industry another lesson, albeit a slightly more painful one: upgrades to consoles don't work (Sony, take note with your upcoming PS2 model and hard drive!).

If all this had been simply an expensive mistake, then it wouldn't have really mattered. No, what really hurt was SEGA delaying their sequel to the MegaDrive – the SEGA Saturn. This mistake proved disastrous. A giant shark named Sony had smelt blood (or rather money) and, after a brief period of swimming alongside Nintendo's R&D team, had broken away to make its own console – the PlayStation. It was grey, sleek and, although not cheap, was very easy to develop games for. Sony used its knowledge of the video and music sectors to win retailers (stinging from the disaster of the Mega CD and 32x) and strengthen its cause.

SEGA had found its nemesis, a company called Sony. Amazingly, the Saturn was initially planned as a sprite-scaling powerhouse (the technology behind games such as *Out Run*, *PowerDrift* and *Afterburner*). After taking one look at the specs for the PlayStation though, and

Issue 5 – Dead Or Alive 2
Four bikini-clad buxom beauties on the cover this month as the stunning *Dead Or Alive 2* made its first appearance – they almost distracted us from reviewing *Crazy Taxi*, *Virtua Striker 2* and *Tee Off Golf*. We also got to look at *Jambo Safari* – shame it never came out, but there you go!

Issue 6 – Tomb Raider: The Last Revelation
Lara finally moved away from Sony and ventured back to SEGA. She'd never looked better either with the fantastic graphics chip boosting her ample assets yet further. If that wasn't enough we also got our first look at *SEGA GT* and *Daytona 2* and reviewed *Soul Reaver*.

Issue 7 – MDK 2
We never did manage to find out what it stood for (murder, death, kill seems to be the favourite theory) but that didn't stop us from reviewing one of the weirdest shoot-'em-ups on the console. We also got our first play of seminal swimmer *Ecco the Dolphin*.

realising the future was 3D, SEGA quickly decided to boost the system adding an extra SH-2 chip and an improved 3D graphics processor.

This last-minute addition made the machine technically superior to the PlayStation, but a nightmare to program for all but the most talented of developers, who quickly decided that Sony's PlayStation was the way forward

Keep The Faith

All this may sound like a string of disasters, but every rose has its thorn, and just as every night has its dawn... and in this case there were a legion of cowboys singing a sad, sad song. For out of all the distinguished console manufacturers, it is possibly SEGA that commands the most loyalty from its fans. Sure, there were technical mistakes made by SEGA R&D, marketing mistakes made by men in suits, and business decisions that turned pearls into swine! But there was *Shinobi*, *Sonic The Hedgehog*, *Virtua Fighter*, *SEGA Rally* and a score of amazingly good games. Sure, we'd all sit by and shake our heads as SEGA made another bad business 'decision', we'd all sit

around and ponder where it all went wrong and get down on our knees and pray that SEGA would get it right next time. Because we knew, in our hearts, that SEGA made better games than Sony – and that's why we were buying consoles in the first place.

It was early 1997 when we first saw supposed specs for a new SEGA system. Vigorously denied by SEGA, the machine – codenamed Black Belt 2 – would have a Power VR graphics chip, a SH-4 processor, an in-built modem and, bafflingly, would have a Microsoft operating system. Images of Windows 95 booting up on a console screen sprang to mind, but we quickly cast all other doubts away as wave after wave of

(often conflicting) information wafted around the world.

It was called Dural, not Black Belt. It had a 3DFX graphics card, then it was back to Power VR graphics. The modem was in, then it was out again. It was called Katana, no... The Dragon, no it was definitely called Black Belt. It was being made in Japan, no... America. It appeared to have five different processors, three graphics chips and a cleverly installed kitchen sink. The only relatively consistent piece of information was that it would use Microsoft OS and have a modem!

Eventually we found that SEGA was developing two different machines, one in America (Black Belt) and one in Japan (Dural). The better system (eventually Japan's Dural) would go on to become the Dreamcast – SEGA's all-new 128-bit powerhouse.

In 1998 the Dreamcast arrived and it soon became clear that SEGA had learnt important lessons from its previous mistakes. The machine was literally a doodle to program – coders loved it like their own mothers and amazing results could be instantly achieved with minimal

Launching The Titanic

By no means was the Dreamcast the easiest console to launch. Delays, disasters and deadly enemies collided to make the most turbulent launch ever. Here are our favourite Dreamcast launch stories:

Australia

The daddy of all mistakes. Dreamcast was delayed in Australia and launched amid little fanfare by Ozisoft (the Australian distributor for SEGA consoles). The only problem was the machine launched without peripherals, browser discs or games. This hold up effectively made any customer purchase redundant.

Europe

You can spell 'delayed'? We waited, and waited, and waited. Then we waited an extra month as the Internet service wasn't finished. Then when we got it the Internet service didn't work properly anyway.

Japan

Not known for tardiness, the Japanese took a dim view of the week-long delay caused by a shortage of graphics chips (British punters dream of delays of just a week!). When the machine eventually came out though SEGA only managed to sell 100,000 machines.

America

Finally, something went right for SEGA. Launched on a memorable date (9.9.99) and finally not a delay in sight. Hyped to the max and with plenty of machines ready and waiting the whole situation worked a treat. Lucky Yanks!

Issue 8 – Dead Or Alive 2

Those girls looked so good we had to use them twice. We just couldn't resist as the finest-looking fighter came in for review. The gameplay wasn't up to *Soul Calibur*'s standards, but it was fun to play and looked incredible. So did *Ecco The Dolphin*, but fins just don't do it for us. Other highlights included our first look at *Virtua Cop 2*!

Issue 9 – 18 Wheeler

Big trucks were the flavour of the month as SEGA released information on yet another innovative racer. It may not have had the fastest wheels, but it had the biggest! It was also a good month for shoot-'em-ups as *Quake III* and *Half-Life* were announced. Sadly, it wasn't the best month for reviews with *Wacky Races*, *GTA 2* and *Fox Fighters* failing to set our world on fire.

Issue 10 – Samba De Amigo

We didn't care how daft he looked – that monkey with maracas was going on the cover no matter what! Other highlights included *Ferrari 355*, *Resident Evil: Code Veronica* and *Tony Hawk's Skateboarding*. But it was the monkey that stole the show.

continued

Sell it baby, sell!

If there was a book called 'marketing mistakes not to make' the first ten chapters would cover SEGA Europe's attempt to advertise Dreamcast. Making virtually every possible mistake and inventing a few new ones all of its own.

Nonsensical Print Ads

Swirling clouds, twirly eyes and a DC logo shaped in what appears to be human embryos. No mention of the machine, no mention of the name, no mention of SEGA, no... nothing to explain it at all. Turn the page now!

Hip TV Ads

Trying to distance the machine from gamers and capture the lifestyle market, SEGA pitches a series of ads depicting anything but games, gamers and consoles. Barbers shaving heads and kids throwing stones will sell the machine!

Mockery of Yukawa Hidekazu

This one we actually like and it worked well. In Japan, company manager of SEGA starred in a TV ad where kids hurt abuse at him for the failure of the Saturn. It showed that SEGA had a sense of humour and, importantly, got the message across that the Saturn was dead and Dreamcast was coming.

Footy Funding

Kids love football, kids love games, kids watch football, kids watch football then buy games! Let's get together and give away money. Lots of money! Around 50 million pounds to Arsenal - just to put our logo on the front of their footy shirts. We'll have no money left for prime-time TV advertising and, because nobody knows what Dreamcast is, it won't have any impact.

Political Sabotage

Cleverly combining racial hatred with political terrorism SEGA projected racially contentious images onto the houses of parliament. Then took photos and used them in ads across the country. Designed to emphasise the importance of competition and online play the ads were funny - If you knew what they were about. The general public didn't and the Independent Television Commission told SEGA to pull the ads.

effort. The modem was supplied with the machine which meant that every Dreamcast owner would be able to go online with no upgrade necessary. Heck, it even looked cool!

SEGA's R&D team had finally delivered the goods, an incredibly powerful machine that blasted the competition out of the water a good year before Sony could react with its PlayStation 2.

We Have A Dream

They say sing when you're winning, and we sung till our heart was content thanks to *Virtua Fighter 3*, *SEGA Rally 2* and *Sonic Adventure*. But it was the third-party developers that really wowed us. After ignoring the Saturn, a stream of amazing fighting games appeared. Capcom redefined the genre with *PowerStone*. Midway stood tall with *Ready 2 Rumble* and, above all others, Namco forgot its close ties with Sony and produced *Soul Calibur* - still considered by many to be the greatest beat-'em-up available on any console.

Finally, for once, it was all going to be all right - we had the machine, we had the developers, we had the games. We had Sony, with its shoddy sequels and shabby 'knocked-out-in-an-afternoon'

excuses for videogames, well and truly over a barrel!

Before the Dreamcast arrived, Bernie Stolar, CEO of SEGA of America said: "This is going to be the greatest launch in the history of SEGA, and it will also be the largest launch in the history of this industry, to date." In many ways he wasn't kidding, but we should have known something was amiss when he mysteriously left SEGA three weeks before the machine launched. Did he know something we didn't? Despite the Dreamcast being hotter than hell in a heartbeat, the reaction from the public was lukewarm. For the first, but certainly not the last time, we wondered, "What the hell is wrong with people?"

Over time the answer became clear - SEGA might be capable of making the machine and may be capable of making the games, it can even (at least at the start) convince other companies to make games for them, but what it can't do is convince non-believers to buy their products. SEGA Europe is, in short, lousy at sales and marketing. Sony, on the other hand is a crowned champion in the mould of a used-car salesman - capable of selling sand to camels and convincing them it's the best thing to drink in the desert despite the humped dolls

Issue 11 - Colin McRae Rally 2.0
Colin McRae raced into our magazine, stumbled and spluttered, then never came out. The first great disappointment for us as it promised to be the greatest racing game ever. Still, we didn't know at the time and got to review *Marvel Vs Capcom 2* and *Bust-A-Move 4* too.

Issue 12 - Ferrari 355 Challenge
SEGA blazed back at critics who claimed its racers were too arcadey with this amazing racing game. That wasn't the only surprise though: we also got to see *Silent Scope*, which turned out great even without the gun. We also reviewed *Virtua Tennis* and *Jet Set Radio*. We couldn't have asked for more. Happy days!

Issue 13 - Half-Life
Who is Gordon Freeman? Who knew years before PS2 owners started even asking the question as we'd already played the game. We also heard about *Phantasy Star Online* for the first time, which made our mouths drool! But the big game was *PowerStone 2*, which brought the entire office to a halt!

standing next to a clear blue oasis of tasty water.

Despite the machine being great, the launch itself was not without its faults: Japan suffered stock shortages, Europe's launch had to be delayed by a month, and Australia... well, the less said about that, the better (see 'Launching The Titanic' box for humorous details). Only in America did everything go to plan with plentiful stock arriving on a memorable day (9.9.99) and selling by the bucketload.

Card Shark

It was clear though that SEGA wasn't wholly to blame. A certain company called Sony was playing every dirty card in the pack. Every time SEGA had an important announcement, launch, or game coming out, Sony would set off a firework of facts about its upcoming PS2 system. The claims started big with 300m polygons per second, and got more ridiculous as time went on, an emotion engine capable of recreating real-looking people. Eventually they became outrageous with Spielberg chipping in claiming that it was "incredible" and that the "effects found in Jurassic Park will be in front on your

television at home!" After that it just became plain silly – in a moment of surreal madness, the American and UK governments stepped in worrying that the PS2 might be used by Middle East terrorists to launch ballistic missiles across the globe. The unreleased console was classed a 'Super Computer' promptly banned from being sold in several 'rogue states' and put upon the Western governments list of 'items to be concerned about.' Sony had, quite literally, managed to convince the world that they had built Darth Vader's DeathStar and were going to put it on sale in time for Christmas. And the public bought its spin – and didn't buy Dreamcast.

It would be too easy to pin all the blame on Sony (it's tempting thought), because SEGA played a fair share in its own downfall. Launch mishaps aside, the marketing campaign for the Dreamcast was sublime to the point of non-existence. After the failure of the Saturn, SEGA tried to distance itself from its own name, referring only to the machine as Dreamcast and not the SEGA Dreamcast. In its advertising

"Despite the Dreamcast being hotter than hell in a heatwave, the reaction from the public was lukewarm"

the company even appeared to distance itself from the name Dreamcast, only using the swirled symbol. If that wasn't well enough hidden, the symbol was then masked with obscure images such as the famous swirling stormfront advert that depicted a swirled cloud hovering off the south coast of an American weather map, swirl shaped haircuts and a close-up of a swirly eye. The result was a nonsensical series of ads that said nothing about games and featuring a hidden symbol that most people didn't recognise. The Dreamcast didn't have 'brand awareness'. The Nike symbol is recognised across the world as a brand of trainers – the Dreamcast swirl wasn't recognised anywhere outside of SEGA's Headquarters. Unlike Sony's equally bizarre adverts for the PlayStation2, the Dreamcast adverts went totally unnoticed as there was no public interest in the first place.

Issue 14 – Shenmue
Our second Shenmue cover! This time we'd managed to get into the game and it was becoming clear at this point that Shenmue could become the most important game in the world. Reviews included Ultimate Fighting Championship and Space Channel 5. Only Miyako Athlete married a pretty decent month!

Issue 15 – Phantasy Star Online
Welcome to the world of genuine online gaming with both Phantasy Star Online and Quake III making their first appearance. We also got Metropolis Street Racer in for review and spent the entire month skidding around London, earning Kudos points and laughing hard at Ridge Racer 5 on the PS2. Nice.

Issue 16 – Unreal Tournament
Long regarded as the best PC shoot-'em-up we were glad to see UT on the DC. But this month really belonged to the reviews. Shenmue, Quake III and Ready 2 Rumble Round 2. How we ever managed to write a whole issue with games like that in to play we'll never know.

Issue 17 - Alone in the Dark 4
We got our first look at a game set to revolutionise survival horror. Armed with little more than a torch it looked great - shame it ultimately failed to deliver but there you go. On the bright side we also got our first look at *Crazy Taxi 2* and reviewed *Tony Hawk's Pro Skater 2* and (um) *Tomb Raider 4*!

Issue 18 - Sonic Shuttle
Sonic came back in this lousy party game that totally wasted his talents - a testing time for our faith in SEGA and a poor month for reviews with *Aqua GT*, *The Grinch* and the *Record Of Lodoss War* rather spoiling the normally stunning line-up of games. We ran a feature on *Sonic Adventure 2* to cheer us up!

Issue 19 - Spider-Man
We slung with spidey but the biggest news was getting *Phantasy Star Online* in for review - huzzah! And the server was finally up and running so its true genius became clear! Finally, we could all go our separate ways and play together without looking at each other. Nice.

Don't Imitate, Innovate

>SEGA is famous for technological innovations. From its arcade roots, to its recent successes, SEGA has consistently believed in pushing the boundaries of technology. Not only does it make new innovative technology - it makes innovative games to with it! Here are our favourite SEGA innovations:

Electronic Maracas

SEGA develops a revolutionary recognition hardware that can precisely position the space of an object in relation to a sensor. The possibilities are endless: a gun game where you avoid getting shot, a fighting game where you control your fists in real-life! No, far too normal. How about a pair of maracas that you can shake in time to Salsa versions of pop songs simultaneously making sure you dance and shake them. In the right place as instructed by a monkey sporting a giant Mexican hat? *Samba De Amigo*. We love you SEGA!

He Speaks To The Fishes

SEGA develops a revolutionary voice recognition technology allowing you to speak commands to your console via a microphone that plugs into the control pad. The possibilities are endless: shooting games where you give voice orders to other pilots, adventure games where you actually talk to the characters. Nope, far too normal! Instead we'll get a fish and give it a human face. It'll grow inside a fish-tank, swim around and when you talk, it'll talk back. It can learn from you and develop into a fully-fledged artificial fish-based lifeform. We love you SEGA!

He Catches Fishes

SEGA develops a unique motion sensor technology that can precisely recognise the shaking and movement of an object. The possibilities are endless. How about a Monkey trapped in a ball on a tricky platform suspended in mid-air? And get this, you control the platform - not the monkey. It just rolls around in the ball. We'll call it Monkeyball! Don't be ridiculous - that's the stupidest idea we've ever heard. Instead we'll play a sports fishing game where you have direct control over the casting of the rod. Sensible idea that, we'll call it *Bass Fishing*. We love you SEGA! You got there in the end, even if we had to buy a GameCube!

I Want To See My Memory

SEGA develops an original (though somewhat questionable) alternative to cheap memory. By forgoing any presence of original thought it rides the back of the then fashionable Tamagotchi craze and puts a screen on the side of its memory card. The possibilities are endless. You can carry your game saves around with you as little critters and look after them. They can grow and stuff. You won't care in the first place and certainly won't care by the time the machine is finished and the Tamagotchi craze is well and truly over. Oh! And the memory cards will cost over £25 pounds to buy. Still, it'll have buttons on it and everything. Even a nice cover for the screen. We didn't love you this time SEGA!

Singing Chimps

It's important to recognise that between the Saturn's flop and the Dreamcast's launch, the market for videogames had changed beyond all recognition. No longer were gamers geeks that hid in their bedrooms. They had grown up, got houses, girlfriends, mates, drank beer, watched football, danced in clubs and convinced their non-gaming mates to buy PlayStation.

Gaming had gone mainstream and SEGA tried to go mainstream too by doing the most sensible thing and sponsoring Arsenal football club for an unspecified amount of money (rumoured to be around £50-£60million mark). Intended to demonstrate that SEGA had serious money to spend on its new console, in retrospect it's easy to see that this as a mistake. The new so-called 'casual gamer' knew nothing other than PlayStation. They didn't know what a Dreamcast was, most probably thought it was a new brand of Aloppops.

It's easy to laugh. Our Dutch friends used the word SEGA instead of 'Wanker' and thoroughly enjoyed watching international matches played against Arsenal. They may have had a point too. Think of the vast amount of genuinely informative advertising could have bought for that kind of money! The type of advertising that goes: 'Monkey look! New console! Called Dreamcast! Great

games! Better than PlayStation! Great games! Called Dreamcast! Go buy!'

Finally, there was the final advertising blopper, proudly announcing that the Dreamcast had a modem with the catchphrase 'up to six-billion players'. The key words being 'up to' that presumably meant any amount of players less than six-billion, 'zero players' for example, as not a single game had genuine online multiplayer capability SEGA quickly had to withdraw the advert after the Advertising Standards Agency stepped in.

But for all this, great games kept coming out, albeit in a slow drip. After the initial flurry of mostly fighting titles, great sports games like *Virtua Soccer*, *SEGA Bass Fishing* and *Virtua Tennis* appeared. Incredible racing games like *Metropolis Street Racer*, *Ferrari 355* and *Le Mans* came to the system. Fantastic adventures such as *Skies of Arcadia* and *Phantasy Star Online*. Even the occasional classic such as *Resident Evil* made an appearance and knocked the PlayStation version for six. Above all else though it was the bizarre original titles that separated Dreamcast owners from PlayStation gamers. Sublime classics like *Samba de Amigo*, *Jet Set Radio*, *Seaman* and *Space Channel 5*. Finally there was the incredible experience of *Shenmue* - possibly the most realistic adventure ever made and an ambitious attempt to re-create real-life in a game.

Issue 23 - Crazy Taxi 2
We went back to cabbies this month! *Crazy Taxi 2* improved upon the original in every way and *Sonic Adventure 2*, *Headhunter* and *Shenmue II* appeared in the mag. We couldn't have asked for more.

Issue 24 - Soldier Of Fortune
Feeling in a particularly generous mood, we gave away an *Xtreme* cheats CD this month. The mag sold like hotcakes and cheered us no end. We also reviewed *Sonic Adventure 2*, which improved upon the original but the less said about the rest of the games the better, the highlight being a PlayStation version of *GT2* running on Bleemcast. Annoyed Sony at least!

Issue 25 - Beach Spikers
We thought everybody needed cheering up and what better way than bikini-clad beauties playing beach volleyball. This month was bright too, with *Bomberman Online* announced and reviews of *Phantasy Star Online Ver2* and *Capcom VS SNK* Pro centre stage.

Issue 20 - Outrigger
With the entire SEGA community busy online fighting against each other in *Phantasy Star*, nobody really bothered this month. *Stunt 2*, *Acropolis*, *NBA Hoops*, *Ducati World*... don't all jump up at once. The *Typing Of The Dead* showed once again that SEGA had a knack for innovation—combining learning with blowing the heads off zombies!

Issue 21 - Sonic
With the entire SEGA community still busy online playing *Phantasy Star* (and filling forums with endless conversations about it) came another fall. This month's sorry review bunch included *Stunt GP*, *Rage Spear*, *Iron Aces*, *Charge 'N Blast*, *Cannon Spike* and *SEGA Smash Pack*. Hating every one of them, we put Sonic on our cover instead!

Issue 22 - Black And White
Those tiger burning bright. Finally the new games are no longer s'tite. We took a deep breath of relief as everything started to pick up. *Unreal Tournament* and *16 Wheeler* in for review and *Black & White* as our main feature (another game that ultimately failed to materialize).

Production Line

There was a price for all these classics. Like its other stalwart rival Nintendo, SEGA couldn't produce games quickly enough to satisfy Dreamcast owners. Making games like *Shenmue* takes time, and gaps between games grew long and wearisome. *Metropolis Street Racer* was a pinnacle of achievement for delayed software. An ambitious racing game that planned to recreate three famous cities: London, Tokyo and San Francisco right down to the correct buildings, shop fronts and street signs by taking thousands of hours of video footage and hundreds of thousands of photographs. Eventually it became so delayed that the designers had to re-work the game to take into account all the new landmarks that had actually been physically built during development, thus delaying the title even further.

On the bright side though, online console gaming came to fruition for the first time in history. SEGA released the first game, a puzzler called *Chu Chu Rocket*, was sent free of charge to every

Dreamcast owner who had registered their machine on DreamArena (the online portal for Dreamcast owners). *Quake III* quickly followed proving that online gaming was more than just a simple gimmick suited to puzzlers, and towards the end of the console's life the seminal game *Phantasy Star Online* brought gamers from around the world to adventure together. Breaking all language barriers by converting messages between gamers into the correct language, it broke the mould of online gaming and proved that it could, and indeed did, work.

If online gaming had worked earlier maybe things would have been different. Whilst these developments took place, third-party support continued to wane – as developers saw that Dreamcast was stumbling and quickly canned projects, or hastily rushed out PC ports of

their existing games. Big guns like EA never supported the machine. In the first place leaving a big hole in the software line-up – the Dreamcast especially lacked big sports licenses, especially FIFA. Hardcore SEGA fans might not have bemoaned the loss of EA's games (often ridiculed as cheap McDonalds-style fodder for the masses), but it's what feeds the general public who aren't prepared to wait six extra months for an original title – they want the latest football tie-in to play after the pubs have shut.

Sony filled that need by releasing the PS2 to great fanfare. Hardcore gamers smirked at the quality of the initial titles that paled into nothing next to the average Dreamcast game. Third world generals may not have bought them to launch missiles, but the general public lapped it up though, buying as many

"It's important to recognise that between the Saturn's flop and the Dreamcast's launch, the market for videogames had changed beyond all recognition"

Issue 26 - Virtua Fighter 4
At the time we laughed. We'd just seen test versions of *Virtua Fighter 4* and *Tekken 4* arcade machines and it was startlingly clear which was the best. We knew which was going to Dreamcast and which to PS2. We also got the first look at a new game called *Rez*, a bizarre musical shooter. Confusing, but addictive!

Issue 27 - Head Hunter
SEGA took on *Metal Gear Solid 2* with their own stealth adventure title turned out to be much more interesting. You just can't tell some people! We also got our first look at *Shenmue II* and pulled out the muzzies and fishing rods again for *Samurai Amigo Ver. 2000* and *SEGA Bass Fishing 2*. A good month!

Issue 28 - Tennis 2K2
By now it was clear that the games weren't coming. *Tennis 2K2* on the cover (not as good as *Virtua Tennis*) and features on when SEGA was going next. *Copcom Vs. SMK 2* and *Headhunter* both came in for review though, showing that there was still life on the Dreamcast.

machines as Sony could make and sub-standard versions of *Tekken Tag Tournament* and *Ridge Racer 5* to go with them.

In The Red

It became clear that SEGA was in real financial trouble. SEGA posted \$375 million in losses for the fiscal year ending in March 1999 and was already forecasting a loss of \$99 million for the fiscal year of 2000. The PS2 reared its ugly head and support from developers dropped like flies. The writing was on the wall, and unlike SEGA's swirly ads it was clear enough for everyone to read: "Dreamcast RIP!" The big question was: "Can SEGA survive another flop?" and "Will there be a Dreamcast 2?" Rumours quickly surfaced that a machine was in development, but as time went on it

became clearer that SEGA was in no position to launch yet another console – no matter what they had hidden in their R&D departments.

Speculation ran rife. In March 2001 SEGA issued a press release stating that it was halting production of the Dreamcast, slashing the price of the machine to \$99 in the US, selling off its remaining models and was to begin development of games for Nintendo's Game Boy Advance and Sony's PlayStation2. Its days as an independent console manufacturer were over – it was now a third-party developer.

The first few games have already appeared. *Virtua Fighter 4* is the best beat-'em-up on the PS2, but we can't help notice that *Space Channel 5* looks a bit jaggier on Sony's console than on the Dreamcast. Indeed, for all Sony's hype, the PS2 has yet to produce one game that couldn't easily have been made on the Dreamcast – in many cases the games could probably look slightly better. According to most programmers it could be made in less time, using fewer programmers, utilising simpler coding and ultimately would cost less money to make and consequently less money to buy.

Still you can't help but laugh. We laugh bitterly at Sony owners as they pick up another sub-standard game made for their overpriced console. Gaze in wonder as a PS2 owner picks up a game that, you know... you KNOW isn't any good and pays £45 for the privilege. Watch as they walk past the few remaining

Dreamcast consoles being sold off for between £43 (second hand in GAME folks) and £100 (with three free games and a VM card) to pay full whack for a game you wouldn't use to wipe your shoes with.

Go on, have a laugh... If you don't you'll cry. The world isn't fair and you've just realised the inevitable. The GameCube is great, and you can play *Super Monkeyball*, but that's it as far as original SEGA titles go (at least your gaming soul will be somewhat purer than a PS2 owner's!). Forget the Xbox – its going to make the Dreamcast look like a runaway success story. But, if you want *Virtua Fighter 4* (and believe us you do) then you're going to end up buying a PS2. If you haven't already got one, that is.

It's easy to get bitter, after all when you see a great machine, with fantastic games being totally ignored by the

"In March 2001 SEGA issued a press released stating that it was halting production of the Dreamcast"

Issue 29 – Shenmue II

All things must come to pass, but at least the Dreamcast went out with a bang. This month was a final push as SEGA started to push out its final batch of games. Top of the pile was *Shenmue II*, which we had to review this month. No surprise that it was brilliant, but that only highlighted the unfairness of the world.

Issue 30 – Now That's What I Call Dreamcast Gaming 2001

The end of a year and pretty much the end of the Dreamcast. On the bright side it was selling quite well thanks to vastly reduced prices on both the machine and games. We took time out to create an issue for all these new owners letting them know what they'd been missing.

Issue 31 – 20 Dreamcast Games You Must Own

Not the most exciting cover for regulars, but with the machine now on life support we needed to do our SEGA duty. The big shock this month was *Re-Vu*, which appeared after all! Ah, the musical bliss of shooting surreal objects in space and time...

End of an era

>It had to come to an end at some point, didn't it? The Dreamcast was a damn fine little machine with some excellent games – of course, I'm more than happy that SEGA sacrificed it in order to continue doing what it does best, rather than going under for the sake of pride and leaving us without a truly great games developer. Still, you can't help but think that the demise of the Dreamcast is like the death of a celebrity that wasn't very popular – when they were alive, they got nothing but bad press and then as soon as they snuff it, everyone's saying what a shame it is that they're gone. Curious...

>SEGA has long been a fine developer of games and consoles right back to the day when the MegaDrive took over our lives. I have always been a fan of SEGA and find it rather disappointing that it has left the hardware market for good. Luckily, it is still continuing to make games for other formats including PS2 and GameCube and these games are sure to be massive hits. SEGA has a knack of combining fast action with good control making all their games fun. Among the many highlights the Dreamcast has held for me have been *Virtua Tennis*, *Crazy Taxi* and not forgetting the return of *Sonic the Hedgehog*. I truly believe that the Dreamcast is a superb piece of hardware and at a bargain price of £49.99 you will be hard pushed to find anything better for your cash. So long SEGA... It's been fun!

>What can you say that hasn't already been said? If there were any justice in the world then SEGA's criminally overlooked 128-bit console would still be going strong today. It was the machine that had it all: a decent launch line-up, a competitive price point, great games and Internet access out of the box. How could it fail! Simple: bad advertising. For example, with Namco's stunning conversion of *Soul Calibur* the Dreamcast had its very own killer app. So, did we see footage of the game in the ads? Did we, hell, instead we got images of people in barber shops and voiceovers from jumped up little spidery like Malcolm McLaren. Then just as the publishers and public were beginning to realise that SEGA's machine was actually rather good Under Sony steps in and steals SEGA's thunder with a bunch of hot air regarding the PS2 – a machine which we now know offers precious little over our beloved DC. Game Over.

>Why? WHY? Why did the best console on the market suffer such an ignoble and ignored fate. What is wrong with people! It was cheaper than the PS2, the games were better than on the PS2 (especially at the start) and it had a built in modem for online gaming. It even had the best best-of-its-kind ever, *Soul Calibur 2*, which wasn't bettered until SEGA themselves made *Virtua Fighter 4*. I loved my Dreamcast, right up until the point where I split coffee into it and smoke came out of the side. Shame the vision went a bit wonky after that.

>There's little point wagging the finger, but the Dreamcast unfortunately failed to ignite much interest in casual gamers and that was the reason, ultimately, why it has met this unfair end. This might have been due to a lack of decent marketing of its software, it might have been thanks to the PS2 and Sony's much more craftier hype-machine – who really knows? What is certain is that many of you guys who have been reading Dreamcast Magazine are the true faithful. Able to recognise a quality console and stick with it and with the games that have been released over the last few years it's easy to see why. So, well done, and if you have yet to buy an Xbox, PS2 or GameCube might I recommend that you buy a copy of CUBE, PLAY or XBM so that you can make an informed purchasing decision? general public in favour of a more expensive, technically inferior version. It's not always about the games, often it's about marketing, sales and never underestimating the stupidity of people who JUST DON'T UNDERSTAND! But still, at least you've played good games like *Phantasy Star Online*, *Shenmue*, and *Soul Calibur*. You played them long ago when other Sony owners were playing *Tomb Raider 5* on their crumbling systems. So take those memories with you and keep playing the games until you've had enough – buy the games you missed out on first time around at bargain bucket prices and convince anybody you know that a Dreamcast for £50 is better than a PS2 for £200.

We would just like to end the article, and our magazine, with a message to a company close to what remains of our hearts: Sony! We will buy your console, we will buy SEGA games made for it – especially *Virtua Fighter 4* (which, we note with glee, appears to be unrating over Tekken 4 from a considerable height). We will give you our hard-earned money... but we will never like you!

We thought this would be the last one and we'd be writing about Game Cubes and PS2s at any moment. So we thought we'd go out with a positive look at everything that'd ever come out on the Dreamcast. And a pretty impressive line-up it was too, we hadn't fully realised what Dreamcast had achieved until this issue.

Issue 33 – Phantasy Star Online Ver. 2
The Dreamcast proved to be a gift that keeps on giving. We thought it was dead and gone, but SEGA took a final chance and pushed out *Phantasy Star Online Ver. 2* which we promptly got in for review. It wasn't without its faults, but the SEGA community met once again online for the last time.

It's in your hand so you don't need us to tell you what's inside. We've few new games left; but we have got memories. Conflict

Probably the last third-party game to come out for the Dreamcast, it would be nice if it was something really special. Surprisingly, it's an RTS game. But is it special? Read on...

Over its short life the Dreamcast has been home to some truly original and inspiring titles. From the mad rhythm action game *Samba de Amigo* to the calm and subtle *Shenmue*, it was clearly the place to be for variety. One genre it didn't cater for too well however, was Real Time Strategy, or RTS. French developer Mathématiques Appliquées S.A. hope to improve this situation with *Conflict Zone*. Originally a PC title, it has certainly taken its time to arrive, being scheduled for a December release in 2001.

The game itself boasts 32 missions spread across 2 campaigns (plus 2 bonus missions), advanced AI routines that allow for units to react to your actions in a humane manner, and adjust accordingly, and most interesting of all, a media system that determines what resources you have. This is a novel twist: on the usually stale RTS formula, and it works like this: depending on what side you

choose (The good guys being the IPC, or International Peace Corps, the bad being G.H.O.S.T.) you have certain military standards to keep. Obviously, you can't go around slaughtering civilians no matter what side you are on, but being with the IPC means that you get to liberate towns from oppression or rescue people. Being with G.H.O.S.T. allows you to manipulate the media by showing up your enemy through their weaknesses. If you are successful then you will gain more support from the people and the media, giving you more units to play with and more money.

As a concept it's pretty good, certainly an interesting slant on the typical formula. It also means that having to live up to a set standard adjusts the way you play. You will care far more about defence and protection than in other RTS games if it means you are rewarded well.

This leads to the advanced AI. Once you get stuck into the game, you get the chance to assign battles to various

commanders. If you have performed well thus far, then they will be far more competent. Perform badly up to this point and they will just stand there waiting to be attacked. These features are more evident in the campaign modes. For a quick battle, you can choose the other feature - Skirmish.

A staple ingredient in the RTS menu for a few years now, the Skirmish mode is an option where you select your team, a map and the funds you start with. You are then let loose on the battleground for a one-off battle against the computer. This is a far more accessible mode and unintentionally a great way of getting your head around the controls and the units you have at your disposal.

There are 25 maps to choose from based around four generic environments: tropical, temperate, desert and snow. They all offer a different experience, with some being no more than four small islands separated by water and some being almost maze-like in structure.

Weapons Of War

As expected with any RTS game, there are a variety of different units to command. Ground and air units are always a good mix, as you can take out missile launchers with the tanks, send in the choppers to blitz an enemy base and then use the tanks again to clear up the mess. Excellent stuff.

review

Web site: www.ubi.com/conflictzone

(1) Being shot at while travelling up hill? Not a good thing. (2) The base is under attack and nothing can be done. (3) The sandy texture means that both you and the enemy are hard to spot – not always a good thing. (4) Taking a high point always gives an advantage to battle.

Landscaping

> There are four different types of terrain in the game, ranging from Jungle to Arid. They don't make much difference to the gameplay, save making units harder to see, but they certainly look pretty.

The Fog

So this all sounds good... but what does the game actually offer the player? Well, for starters the cut-scenes. They are not especially good quality (not surprising given the age of the game) but they can be amusing. The media concept makes for some pretty interesting tactics too. However, this is where the good things end. You see, *Conflict Zone* is extremely flawed in its execution.

Firstly, the game's boasts are unfounded. The AI does what it says it will, but unfortunately falls victim to the age-old RTS problems. Units standing still while getting shot at, units not being able to work their way around a clump of trees, units shooting at civilians... In short, units not doing what you want them to.

Other gameplay problems go a lot deeper. Say you breeze through the earlier missions as the IPC. You are told to keep down casualties, but instead you go right ahead and blitz the enemy. You complete the mission all right, but the media doesn't think much of you. On later maps, where you need resources you will

then be short due to this. An unfair criticism maybe, but relevant all the same. Maybe the media rating should have been used to gain bonus items or extra missions? That would have made it seem less linear and more like a game where you have been given a set of rules in which to operate as you wish.

The Dreamcast controller doesn't help matters either. Being a PC game, there is absolutely loads of commands, all mapped to the controller in a very confusing manner. This would not be a problem if you had a keyboard and mouse handy, but bizarrely the game does not support these. What an oversight.

The graphics are also a problem. The textures are dull and the lighting is basic. The angles of the hills and valleys are so sharp and the fogging so closed-in that sometimes it looks like an old BBC computers' attempt at creating 3D. In fact, the fog is probably the single most

I Spy With My Little Eye...

One of the better aspects of the game is the camera. It's very smooth and customisable, meaning you always get to see the best shot of the action available. The return to default button is a saviour of confusion too.

annoying fog ever seen in a game – worse even than *Turok* on the N64. You are limited to about three centimetres of viewing area on the field, which causes an untold amount of problems when things start getting hairy. Coupled with the clunky joystick-only controls, you have to be careful not to throw the TV out of the window. Whether or not this fog is done purposely is unknown, but whatever the reason, it completely ruins the game. Any strategies you may have had go out the window as you struggle to determine just where you are, where you are trying to get to and the best way to get there.

Tonka Toys

Texture wise, *Conflict Zone* has this awful half-finished look about it. Sometimes they are mapped quite nicely, other times you can visibly see the pixels. They

[1] Be careful where you shoot! [2] Units should never be sent out alone. [3] Christmas day and people are hunting... too hot. [4] Moving some friends here would have helped. [5] It's all going wrong... where's the backup?

"In no way a last hurrah for the Dreamcast"

haven't been thought out properly either. Where there is grass, there are shades of green. No matter if you can't see your troops or not. Some thinking behind this would have helped, for instance, breaking the terrain up more with clumps of grey rocks would have given it a much more, battlefield type appearance and not made manoeuvring and locating units such a misery.

The snow is particularly evident in the snowy levels – it's just plains of pure

white broken by the odd cliff. Not the most inspiring of terrain.

Once you do start playing though, it is possible to get past these problems to a certain degree. Before long your little computer people are running around screaming in extremely gravelly voices. Swivel the camera around during a battle and with the rockets whistling overhead before crashing into the earth, it all looks rather pretty. But then a tank blows up and any semblance of realism is lost.

Now, realism in games is an interesting point. Usually it's not something you want. The reason most people play games is to escape from the humdrum of real life for a couple of hours. Other games go out of their way to create a realistic environment in which to immerse yourself in so that you can experience real life from another person's viewpoint, perhaps in a scenario you are never likely to see. *Conflict Zone* is one such game. Which is all well and good until the defeated tanks jump up into the air, perform an extravagant mecha-ballet, before tumbling into the ground. Giving you visual feedback as to what has happened yes, but in a manner that simply doesn't work with this game – it looks as if a child has thrown his toy tank into the air. Very odd.

Surprisingly for a RTS game, this is really good. Very orchestral and it

points very reminiscent of *Star Wars*. It's very welcome.

At the end of the day, the most *Conflict Zone* is going to offer is a few hours messing around on the Skirmish mode. The Campaign option gets very grating – it is not always clear as to what you have to be doing and there are no multiplayer modes at all. A glaring oversight as playing via the Net could have breathed new life into the game.

There are some good concepts here, but it'll take a huge amount of patience to explore them. The game is just too dull and generic to warrant a lengthy play. Every staple ingredient of the genre has been ticked off here, with a few variants and the odd original idea. It's a lazy port of a dated PC game, which never looked or played well in the first place. It's in no way a last hurrah for the Dreamcast.

2ND OPINION

Over the years we've been spoilt by the vast array of superb games that have graced the Dreamcast and it would be fitting if the remaining software released for it was just as impressive. However, this is simply not the case. *Conflict Zone*, for the most part, simply lets the side down thanks to its PC heritage and poor conversion. Dreamcasters hoping for a decent RTS game are going to be sorely disappointed so it's probably best to steer clear. With so many cheap DC games available in the shops it's best that you check those out instead.

Cannon Spike

A mindless arcade shooter – lovingly created exactly the way grandma used to make them...

It always seems a little bit too easy to convert an arcade game

over to a home console and the Dreamcast has had more than its fair share of ports. Some of them have been worth bringing across – like *Crazy Taxi* and *House Of The Dead*. Whilst other games can appear to be a complete waste of time and effort. Sadly, the Capcom shooter *Cannon Spike* falls squarely into the latter category.

It's not that this game isn't fun to play, because it is. But if you do end up playing this, you'll soon realise that you may as well scoop out your grey matter

into a nearby bin because brains are not a necessary requirement for participation.

In fact, this is the very definition of a brainless shoot-'em-up and any attempt at a story is, at best, weak. These kind of games are usually very shallow anyway, but *Cannon Spike* makes a kid's paddling pool look like the Pacific Ocean.

Your job, as a member of a Special Forces team, is to kill robot terrorists who are (take a wild guess!) threatening the world. To say that this 'do good' team is made up of an odd bunch is a major understatement. There are seven characters in the game and these include

some classic Capcom characters that you should recognise. The delightful *StreetFighter* babe Cammy is begging for you to play with her – as is *Ghosts And Goblins* man Arthur and the lovely pint-sized Megaman.

Power Trip

Each of the characters in *Cannon Spike* has their own weapon and special attack, but all of them burn lights onto the backs of your eyes. This kind of eye candy is pretty much a given with big arcade shooters, but the crisp visuals and bright light effects of *Cannon Spike* mean

you never tire of watching your gun fire into the hordes of deserving robots. This is a good thing as each character only has four or five methods of attack!

Controlling this game couldn't be easier – you move with the stick and shoot with the buttons! Now, this may sound a tad patronising, but here's the clever bit: if you hold down the shoot button your character becomes fixed, allowing you to strafe from side to side. Add to this a lock-on and you're free to

pretty much do anything you want whilst weaving in and out of the trigger-happy robot hordes

As you get onto the later stages the game genuinely requires some skill. When we say skill we mean proper skill – because the controls are so blindingly simple, you never have to worry about anything other than choosing your targets and dodging enemy fire. If you mess up in Cannon Spike it's because you made a mistake! If you've ever played the

A hunched stage features a pack of dogs that, funny enough, look like those found in *Resident Evil* (also developed by Capcom). And it's still just as satisfying to shoot them down!

Each of the characters in this game has been kitted out with power motor boots. This isn't really explained in the game but think about it—what else would you choose to fight robot hordes?

To say the special attacks are a bit over the top would be the saying the sun's a bit hot.

Going Downhill

A couple of the stages in this game take place on moving backgrounds as you slide down various surfaces. A snowy slope makes the setting for an attack by a huge robot boss on a snowboard who constantly bombards you with mines. He clearly has no respect for the local avalanche laws!

Izna Trouble

They just had to get a *Street Fighter* character in here, didn't they? Well, you get more than one for your money and we're not just talking playable here either. One of the bosses you come up against is Balrog, who attacks you in a caged arena occasionally pulling off a few of his classic special moves.

"There's only so far you can take mindless killing until it becomes numbingly repetitive – just ask any serial killer"

Classic *Smash TV*, you'll know exactly what kind of gameplay we're talking about. Fast, simple, mindless fun!

Firing Blanks

There is one slight problem with this formula, however. Actually, it's a little bit more than a slight problem – more like a glaring error. We are, of course, talking about longevity. This game (like all arcade conversions) excels in short bursts of fun, but totally runs out of steam way, way before the second lap. There's only so far you can take mindless killing until it becomes numbingly repetitive – just ask any serial killer.

This is a shame because the level bosses are inventive (you even get to fight Vega!) but even this isn't enough to break up what is essentially a dull

The final fight on one of the earlier stages might as well be a scene from *Power Rangers*.

With a game like *Jungle Master* you'd think he'd be difficult to beat - easy, no!

monotony. Even classics like *Smash TV* suffered this problem after a while, but at least with that old game you were being constantly bombarded with impossible odds and, essentially, given no time to think. This isn't the case in *Cannon Spike* as the robot drones are few - at most you'll get ten on the screen at the same time. This simply isn't enough!

Spiked

Unfortunately, this pretty much sums up *Cannon Spike* because there just isn't enough of anything to make your visit to infinite-ammo city worthwhile. There just isn't any kind of replay value to be found. Matters aren't helped any by the fact that this game is incredibly easy to finish. Switch the game onto the easy setting (affectionately

known as 'baby') and you can plough through all ten of the levels in a little over ten minutes.

The arenas you fight in are small and the handful of waves you get are hardly overwhelming. In the arcade you might drop a coin in and play for five minutes or so off of one credit, but in this home version you get three credits right off the bat. More than enough to finish the game with no problems. Seven characters may sound like a lot, but spend one day with this game and you'll soon learn just how little there is to do. The ending sequences, consisting of several still images, hardly make up for this with a worthwhile reward!

There is no real reward for playing this game. You're not going to unlock any extra characters, levels, mini-games or

anything like that. This is a pure arcade conversion and the only extras you get for your money is a gallery of artwork. It is undeniably very nice artwork, but it's not exactly what you want to be seeing after the couple of hours of play it takes to see all of the ending sequences!

If you really want a happy ending in your life, it's probably better to avoid *Cannon Spike* altogether.

We've nothing against the simple pleasure of the shoot-'em-up. In fact, once in a while we like nothing more than boosting up such a game and firing at will at all corners. However, we do have certain expectations that must be fulfilled. For starters, we expect some kind of challenge - after all, there has to be something that keeps us coming back for more. Here, though, it's all a bit too easy - with no incentive whatsoever to return. Heavy Metal

The combatants look nice, but the levels lack any character.

Will Capcom's final Dreamcast release rock your world or simply have you headbanging against a brick wall? Read on and find out, dear reader...

Reports of the Dreamcast's demise have been circulating around for well over a year, yet still new software continues to appear for SEGA's hugely overlooked console. Anyway, this latest offering comes from Capcom, which (as you probably know) has been one of the most loyal supporters of the 128-bit system. The company has given gamers a string of excellent titles including the superb *Resident Evil Code: Veronica*, the sublime *Power Stone* games and the exceptional *Capcom Vs. SNK* titles. However (and rather sadly), *Heavy Metal: Geomatrix* falls far short of the standards set by the aforementioned classics.

The game is based on the *Heavy Metal* illustrated novels (Kevin Eastman acted as a consultant on the project) and is set in a distant future where humans have left behind the constraints and misery of the real world and now live out their existence in a bizarre virtual reality known as the 'Geomatrix'. Unfortunately, whilst everyone has been larking around in this brave new world, pollution has led to the melting of the polar icecaps in the real world. The result is that only a few pockets of land have remained above the ensuing flood water. Consequently, several gangs have formed and are now fighting it out in the Geomatrix for

control of said land. Quite why everyone isn't happy just to live things out in the Geomatrix is unclear.

Death Metal

What this boils down to in gameplay terms is a somewhat awkward amalgamation of the third-person shooter and beat-'em-up genres. If you imagine a mix of *Power Stone*, *Spawn In The Demon's Hand* and *Outrigger* (but with most of their good points removed) then you'll get the idea of how this plays. A whopping total of three (yes, three!) game modes are on offer: Arcade, Chaosmatrix and Two-Player.

The first of these is a straight conversion of the coin-op version and the last (as you might expect) allows you to battle it out against a friend in a dire split-screen scenario. Sadly, the online options of the Japanese version have been removed here. So that leaves us with the Geomatrix mode, which, to be perfectly

honest, is a fairly tedious experience. Played out in a series of environments similar to those featured in the PSone release *Metal Gear Solid Special Missions*, you simply pick a character (most of whom are armed with a huge weapon) from one of four gangs and shoot, punch and kick your way through the opposition – occasionally stopping to pick up a few items on the way. In fact, this is pretty much what happens in all the game modes.

Hot Metal

Now this sort of thing has been done before and worked very well, but in *Heavy Metal*, *Geomatrix* a list of flaws combine to ensure that the game never excites or engages the player in any manner. So what's the problem? Well, it's not the characters, which incidentally were designed by Simon Bisley (who has worked on *Judge Dredd* projects among others), the 12 fighters are all nicely

realised if somewhat Americanised in their styling and their arsenal of weaponry looks suitably beefy.

However, the same cannot be said of the lacklustre environments in which the action takes place. Most of these are rather spartan in appearance and lack any kind of sparkle. Making matters worse is the erratic game camera. The ludicrous angles you view fights from often make it position impossible to gauge your foe. Indeed, after a few minutes' play a feeling of

Comic book inspiration

- Heavy metal was a genre of music created way back in 1883 by the quintessential Englishmen Lord Lucas Bon Chien. It was designed as a diversionary smoke screen to distract the attention of the working classes away from salient issues of the day such as the extortionate price of Harry Potter merchandise.
- Scientists in Chipmunk (UK) recently announced test results that confirmed the validity of the long held rumour, which states: "listening to heavy metal music is bad for you if you're left handed." The results were comprehensive and if anyone wants to argue with these new findings they can 'bog off'.
- During a particularly depressing double geography lesson on 13 November 1989, Robert Alfonso Lopez was kicked in the shins for wearing a Guns 'n' Roses T-shirt. Admittedly, the aforementioned beat combo wasn't really a heavy metal outfit, but Lopez smelt quite heavily of sweat and looked quite greasy. Thus, it was deemed fit by a committee (consisting of 14-year-old boys) that he should be kicked in the shins and so Justice was done that day.
- Heavy metal is commonly referred to as 'the Devil's music'. What's more, margarine is commonly referred to as 'the Devil's snoot'.

This is very below Captain's usually high standards. Whangs.

The two-player mode is about as much fun as chewing glass.

Awkward camera angles can make combat extremely difficult.

What A Character

> Several big names from the world of comic books have been involved with this game. Firstly, you have Kevin Eastman who has previously worked on *The Teenage Mutant Ninja Turtles* projects. Furthermore, Eastman is also the driving force behind *Heavy Metal Magazine*. Also involved was the highly respected Simon Bisley, who designed the game's characters. Bisley has also worked on *Judge Dredd* comics and, of all things, helped out with the character design for the motion picture *Galaxy Quest*. Shame they were involved with such an average game really.

nausea will invariably sweep over you thanks to the irritating consistency of view switching.

Worse still is the combat itself. From a distance you and your opponent(s) can attack with long-range weaponry including bazookas, rocket launchers, flame-throwers, swords and pistols. Close-quarter combat is also an option when you find yourself in near proximity of the enemy. The problem is the random nature of the attacks on offer. Regardless of your position, it's possible to land hits on your opponent by simply stabbing away at the buttons in a totally

Gang Warfare

> In the futuristic world of *Heavy Metal: Geomatrix*, four different gangs have emerged as the prominent leaders. You have the 911 Elite, 323 Agents, 707 Metal Heads and finally the 818 Stompers. Each gang has three members, all of whom share fairly similar fighting styles. In the future it is clear that individuality has been stamped out once and for all.

random fashion (a cardinal sin for a game of this ilk). Combos are available and can be learnt over time, but (put simply) anyone who can hold a pad in their hands has a good chance of winning a fight on their first go.

So, the gameplay is nothing to write home about and that's being generous. For solo players the game's over quickly and the two-player mode is an exercise in tedium.

Metal Head

Accompanying the 'action' is a selection of suitably 'rawk-like' audio tracks

including efforts from Megadeath, WASP and Dust to Dust. Suffice to say, these tracks are either a blessing or a curse, depending on your own musical tastes.

All in all, *Heavy Metal: Geomatrix* looks every bit the rushed-out, half-hearted title it so obviously is. Granted, the game does offer a reasonable amount of entertainment, but with so many better alternatives on the market it's very hard to recommend this as a viable purchase. Ultimately, this represents a real missed opportunity, various talented people have been involved with the project and Capcom

certainly has enough in-house talent to produce good games. Unfortunately, this turns out to be a listless piece of software that won't even hold any appeal to the fans of the comic books on which it is based. It's this sort of tosh that brought about the Dreamcast's untimely demise and, as such, it doesn't deserve your attention. In fact, even if you spot this one festering in the bargain bucket of your local game's emporium (very likely in a week or two) it still doesn't warrant a purchase.

You have been warned

2ND OPINION

On dear, Capcom is usually the purveyor of the finest Dreamcast titles, but with *Heavy Metal: Geomatrix* the firm has dropped the ball. The character design is fairly worthy, but aside from that everything else falls flat on its face. The environments are unimaginative, the combat is mindless bosh and the camera angles, well, the less said about them the better. Although the PlayStation version came out here in the UK, *Freestyle Scooter* has taken a long time to make an appearance.

Seeing as how we all think people with those micro-scooters are a complete pain in the ass, we haven't actually got much enthusiasm for this game...

...so thank the Lord that it's not actually that good. Otherwise, we'd all have to smile and try to act happy even though we were crying on the inside.

Uh? Eeekle Rick... huh? Come on then - I'll show you what a stuffed monkey can really do!

Freestyle S

It's exactly like *Tony Hawk's Pro Skater 2*, only on a scooter... and without as many moves... or characters... or levels... and it's really easy and slow. Damn.

We've seen it a million times before - one company comes up with a storming idea for a game, then suddenly there's a slew of near-identical titles coming from all directions. What's more, they usually all suck, as no matter how hard they try, these new games simply cannot match the excellence of the game they're attempting to emulate.

StreetFighter 2 ended up being copied into infinity. *Super Mario Brothers* started a whole wave of platform replicas... the list goes on. Now that consoles have developed as far as they have though, you'd have thought that the games developers might have learned to come up with their own ideas, eh? Err, no...

In a desperate attempt to cash in on the fad of those annoying micro-scooters that many kids and some pretentious adults have bought into, *Freestyle Scooter* takes one of our favourite games to date (namely, *Tony Hawk's Pro Skater 2*) and replaces the skateboard with a scooter. Then it makes the graphics slightly worse - they're nice, but not exactly detailed - slows the gameplay right down and turns the whole thing into a game that'll appeal more to the 'youth of today'... sounds great, yes? Maybe not... and if you're feeling cynical, you can replace the phrase 'youth of today' with 'those too young or gullible to know a blatant cash-in when they see it'.

Of course, the problem we've got with *Freestyle Scooter* isn't that it openly borrows from the great *Tony Hawk's 2* - If it was anywhere near as good then we'd be shouting loudly from the rooftops about how you should buy it. To be honest, it's probably as close to Uncle Tony's game as you could possibly get without getting arrested for copyright theft: the moves, goal and level system are all replicated rather convincingly.

Scoot Or Die

You want some examples? Well, there are two characters to choose from at the start with a further seven to unlock as you save your friends. Sadly, they're all exactly the same—with no added Special Moves to discover or increased abilities over one another, there's absolutely no incentive what so ever to play through the game again with someone different. Then there are the levels... umm, the levels; although there are nine stages to play through, there are only three actual big levels with objectives to complete. Considering the other six Challenge levels can be completed in less than a minute once you know what you're doing, the replay value shrinks even more. And as for the music... oh my god, please don't get us started on that. It all sounds exactly the same! Eight tunes, my arse.

It's not that Freestyle Scooter is a bad game—for the younger gamers out there, it's a decent alternative to the 'tougher' Tony Hawk's 2. For the rest of you though, we doubt you'll get anything more than a few hours worth of play out of it and that's hardly worth the asking price, is it?

weight – after all, the object of the game is to use guns to wipe out your enemies within the confines of a small arena ... and that's it. Still, SEGA's own attempt at the genre certainly manages to bring at least some new ideas to the table over previous efforts, so it's definitely not just a clone of what we've seen before. Even if it were though, it would still be the most gorgeous clone we've ever seen (growl).

Although the main crux of the game is obviously aimed towards the multiplayer side (be it you against friends or you against computer opponents), you might find that you're a bit limited in your selection of characters, weapons and levels to begin with. You'll probably notice all the question marks and locked out options that seem to appear wherever you go – that's where the solo game comes in. To bolster the game for those who are without friends (not that there's

many of you... really), SEGA has added an entire Mission mode that can be played through consisting of four classes with 15 missions in each class meaning there's a whole heap of different tasks awaiting you. Still, you can't just play through them willy-nilly... much like the Crazy Pyramid in *Crazy Taxi 2*, you need to complete a set number of missions for the next row to be unlocked. As well as unlocking further missions, you'll also reveal new weapons, characters and levels depending on which missions you complete. These weapons and characters can then be used to create your own style of

Back To The Roots

Although you'll certainly never have seen it in your local arcade (unless you live in Japan, seeing as it only came out over there), *Outrigger* was originally an AM2 arcade game. It may be only just coming out on the Dreamcast, but the original appeared in November 1999 - before games like *Ferrari 355 Challenge* and *18Wheeler*. All four of the main characters were there for you to fight with, although it only had a selection of 12 levels and a handful of special weapons (showing just how much AM2 has added for the home version). It also used a unique trackball/joystick method for control - the joystick for character movement and the trackball (or 'Eyeball', as it was called) to aim your weapons. What's more, up to four machines could be linked together to allow top deathmatch action, the likes of which had never been seen in the arcades before... excellent!

Tick Tock, Tick Tock

Just because *Outrigger* is a first-person shoot-'em-up, that doesn't mean that all you'll be doing is blasting bad guys... well, almost. Working as a member of an anti-terrorist organisation means that you'll also be dealing with the terrorist's weapon of choice - bombs. During the Mission mode of the game, you will occasionally be placed on a stage with a number of bombs located around the level; it's your job to disarm (or to be more specific, shoot) them before the time runs out. Naturally, you'll need to look high and low to find them all... oh, and don't stand too close or you might just get a nasty surprise. Boom!

player, with the option to choose which default weapons you get to carry (thoming missiles and a UMP-9), which face your enemies see before they die and even what colour clothing you wear – it's all rather cool. Sure, it's not exactly comprehensive but then when all you're doing is pointing a gun at someone and then splattering their brains over the wall behind them, that's not really what you're looking for.

Weapon Of Choice

Like we said though, the focus point of *Outtrigger* is the multiplayer Vs mode... and boy, what a deathmatch experience that is. It's true that many of the arenas are somewhat smaller than those found in *Unreal Tournament* or *Quake III: Arena*, although some of the levels – such as the Water Temple or the Dreamcast-exclusive Japanese sanctuary stage – are quite large in comparison.

Rather than confining the action though, these new-style levels actually make each battle more intense, with less places to hide, there's less chance of players running around aimlessly for ages. Combine this with such gadgets as the Thermography Goggles, which show you the heat signature of your opponents

With this many levels, who's complaining?

"Outtrigger with online play would probably get around 96%... it doesn't have it, so we'll mark it down to 92%. Not bad, eh?"

(even through walls), and you'll find that the action hardly ever lets up.

Another new feature is how you score – rather than simply getting a number of frags to your name, you can now collect points in two ways. Killing an enemy gets you one point, but if you want that extra score you'll need to collect the medal dropped by your fallen foe. Naturally, this brings up all sorts of opportunities for the sly player, as rather than wading into the action and risking getting blown away, clever people might prefer to hang back and then nip in to grab any stray medals before the rightful owner can pick them up. It's a great addition to an already ace game – multiplayer battles are always a close-run thing because of the chance to pick up much-needed points. Some levels are quite small so the chances are there for those who know how to take them.

Guns Out For The Lads

Of course, the problem we're facing is that on the one hand you've got what

has to be by far the most enjoyable first-person shoot-'em-up game on the Dreamcast today and on the other, you need to consider that there's no opportunity to play the game online. Thanks to SEGA's decision to remove it. Gorgeous graphics... no online play... loads of levels, weapons, characters and one-player longevity... no online play... slowdown-free multiplayer action of the highest calibre – no online play Ahh, so it – we just can't bring ourselves to do it. Quite simply, *Outtrigger* IS better than *Quake III: Arena* and *Unreal Tournament*, even if it is lacking in Internet options. If you want to look at it in percentage terms, think about it like this – *Outtrigger* with online play would probably get around 96%... it doesn't have it, so we'll mark it down to 92%. Not bad, eh? Oh, and if you think we're wrong, you might want to try actually playing the damn thing before saying so. So there.

Though essentially the same style of game as both *Quake III: Arena* and *Unreal Tournament*, *Outtrigger* is a very different battle of fish, something which is a direct result of its arcade heritage. Not that that's a bad thing – in fact, it's a good thing as it makes the game not just great fun to play, but really great fun. Oh, and so it might not have the same number of levels or characters as the others, but that really doesn't matter as it looks better than both put together, and has the gameplay to back it up. Absolute quality.

Quake III Arena

It's the daddy of all fragfests. It's got online play. It's arrived on the Dreamcast. Do you have what it takes to enter the Arena?

Oh, the agony of it all. Despite all the promises made when the machine was first released, SEGA has so far failed to deliver the one thing that made the Dreamcast stand out from all the other home consoles around – games with online multiplayer capabilities. Six billion gamers? Don't make us laugh... aside from *Chu Chu Rocket*, and a few throw-away online options in other games (download top lap times? Sod off!), there's been very little reason to use that modem on the side of your Dreamcast at all. Thankfully, though, it seems that rather than letting everyone down, SEGA

has simply been holding back and now it looks like the floodgates are about to burst on the online gaming dam. After months of waiting, we're about to get another taste of online pleasure...

In all honesty, *Quake III Arena* isn't exactly anything new – it's been around on the PC for practically a whole year and as such, has been played to death by the online gaming community already. Also, there was plenty of controversy when it announced the game in the first place, because the previous *Quake* titles had consisted of a solid one-player game with

You know, it's one thing to run around a deathmatch arena while you lie wrist to the deadbones that surround you with your Plasma Gun, but it's quite another for others to know that it's YOU who's kicking their arse.

After all, part of the fun is being able to ram a rocket down your opponent's throat and then stand over them and laugh as everyone finds out you're a destruction-dealing maniac. That's why *Quake III* offers you the chance to customise your own player – as well as being able to select your 'skin' (the look of your character) from a roster of 89(!) freaks, you can enter your own name and choose those all-important coloured effects depending on this season's trend. A few customised keys later and *volla* – not only are you a walking, talking, killing machine but a quick tap on the D-Pad lets you laugh out loud after you've fragged someone. If you've got a keyboard, you can even tap in a message to humiliate your opponents... you cruel, heartless buggers.

multiplayer deathmatches boited on, releasing a game based solely on deathmatches was frowned upon. "How can you play a deathmatch on your own?" many people wondered, as well as exclaiming the usual, "it'll probably be crap" when presented with something they didn't understand. Oh, how wrong they were.

Quake, Rattle and Roll

So, after taking the PC world by storm and starting one of the greatest debates/arguments in the history of games (we've played both of them and still can't decide whether we prefer

Quake III or *Unreal Tournament*) it was only natural that some bright spark decided to convert it to other formats. With a PlayStation2 version also on the way – being converted by EA with no online abilities – hah! – it's a comfort to know that SEGA was so committed to bringing the game to the Dreamcast as a great way to properly kick off the online gaming drive. Considering all the hype the game has received then, can *Quake III* live up to the expectations where other hyped games have failed miserably?

First impressions seem to suggest a resounding "Yes" across the board – going

on the reactions of people who thought it wouldn't be as good as it is (and then realised that it was) the guys at Raster Productions certainly deserve a pat on the back for the job they've done on the conversion. Running at a consistent 30fps and offering a level of detail unparalleled on the Dreamcast so far, it seems that PC conversions can be done well if done properly (are you listening, Capcom?). The ability to use either the Dreamcast pad (intuitive, but a little unwieldy) or the keyboard and mouse (the way it was meant to be played) also allows a variety of control tastes to be

- Some of the messages that we got when we were trying to get online included 'No Carrier Found', 'Server Not Responding' and even 'Connection Impossible'. Great.

One Man Went Online...

Being the thorough gaming review types that we are, we couldn't possibly do a comprehensive review of *Quake III Arena* on the Dreamcast without going online... so we did. Here's how it all goes...

1. Get Connected

After plugging in all the cables and such, selecting the Internet Game option connects you to the DreamArena network... as long as you're registered, of course. If you're not, you'll have to whip out that DreamKey disc and do so before you can enjoy some frag-a-ble action.

2. Choose Your Fight

Once you're logged on and been accepted onto the DreamArena network, your Dreamcast will scan the network for viable *Quake III* servers for you to play. At the time of review, we managed to find over 700 possible sites to play (mostly in France and Germany)... but they were all populated by computer opponents. Ho hum.

3. Get Fraggling!

Just select a server and away you go – you'll immediately be thrown into the arena ready to fight. Just remember to set up your look and controls before you enter, or you'll be a sitting duck while you fiddle away with the menus (like we were). Also, you can't move while 'chatting' so don't waste time trying to taunt your opponents... just show a rocket up their arses to show them who's the boss!

catered for, meaning that ex-PC gamers will feel right at home along with the newbie Dreamcast players. Best of all, though, is the new front-end and overall interface – it might be pretty superfluous to some people, but the opening menu screen alone brings a smile to our face every time.

Movers And Quakers

Aside from the visual differences, the game is pretty much identical to the PC version – the one-player tournament-style game where you go up against a series of increasingly intelligent bots is still here in all its glory, as are the usual selection of death-dealing weapons to enjoy. Not surprisingly, SEGA has managed to include a rather impressive split-screen multiplayer mode for people who want a bit of mate-on-mate action (ahem) without having to go online. Although there's the obligatory death loss in comparison to the one-player mode, it still runs shockingly well – especially with four players all going at it at once.

Our only concern with the multiplayer game is the lack of arenas to fight in: the more people you are playing, the less arenas you get to choose from (20 stages if one person plays against three bots, 11 if two people play and only 6 if three or four players are duking it out). It's fair enough to expect a reduction in detail regarding the graphics, but reducing the number of levels as well? Come on, that just ain't on...

As everyone knows though, the whole point of *Quake III* multiplayer is to play it online – and that's where the Dreamcast version really kicks into gear. Getting connected is simple but once you're there, you'll be up against players from all across the globe so don't think it'll be an easy ride. You'll even be able to take on gamers of the PC persuasion if you're feeling up to it... just don't come crying to us when you get your arse kicked.

Quake Quake Oops

Of course, going online has some major downsides as well... did you really think that it wouldn't? For starters, there's the one point that no one ever makes when talking about online games – money. Because of the way things work here in the UK (so that would be companies intent on making a huge profit rather than offering a good service then), going online from a regular PC costs money, even worse, going online with your Dreamcast costs more simply because that's the way it is. This point is made even more annoying by the fact that *Quake III* is most definitely an online game – to get the most out of it, you'd better be prepared to fork out a wad of cash on your next phone bill...

2. Martin gives Quake III Arena a 90% and he's right, as this is the best first-person shooter on the Dreamcast to date. It looks great and handling around the sumptuous arenas is a joy. The gameplay engenders the sort of pleasure that you'd expect from a high-polished PC game. However, there are a few flaws that smack of a lack of commitment. Though a different game, and on a different console, look at the wealth of options that Perfect Dark offered. Then there's the limitations of the phone systems in the UK. With regular BT lines that most people use restricted to 56kbps (and all UK Dreamcasts only provided with 33.6kbps modems) trust us, that ain't very fast! There's bound to be some lag in the gameplay in Chu Chu Rocket, you had a brief delay between pressing the button and placing your arrow, but getting used to that was easy. With Quake III though, there's no lag or moving around the arena, only with firing your weapon. You press the button, your weapon fires... and a split second later, the bullets/rocket/plasma bolts leave the gun and fly towards their target. This might not sound so bad but when you consider that by the time this happens, your opponent has had time to move aside and blast you himself... well, it just gets plain irritating. Bloody Internet.

The problem is that it's such a tough call - sure, there are a few things wrong with Quake III on the Dreamcast but the fact that it stands as the best first-person shooter around makes it an essential purchase anyway. Of the niggles that there are, only the lack of online multiplayer arenas really stands out as a major fault in the game... aside from that, we see no alternative but to say that you really must go out and buy this game. The final score might seem harsh, but then that's the kind of people we are - if you've got a problem with it, we'll see you in the arena for a little chat.

Confidential Mission

Tuxedos, vodka martinis and a handful of suave chat-up lines at the ready... it's time to become the ultimate gun-toting spy!

Think back to when you were young (if you're as old as us, that's a whole lot of thinking) and try to remember what you wanted to be when you grew up. A train driver? A fireman? An astronaut? Maybe. For us though, we were raised in the days of black tuxedos, the odd trip to Russia to save the world from nuclear war and men with a licence to kill... you see, back when we were

nippers, everyone wanted to be James Bond. The women, the cars, the excitement and the women - we wanted it all... especially the women. As we got older, though, we had to make do with what we could get - watching the films on video, playing *GoldenEye* on the N64 and mixing vodka martini in a tupperware jug was about as close as we ever got. Now, however, we have the

chance to get dressed up and act all secret agent-like once again... if only to play SEGA's latest shoot-'em-up conversion and escape our drab little lives for a few minutes.

Do You Expect Me To Talk?

Converted from the arcade game of the same name (which we looked at back in issue 18), *Confidential Mission* is a game that'll bring a big smile to the faces of those of you that own *House Of The Dead 2*. Why? Because after aeons of waiting, you'll finally get the opportunity to dust off that Dreamcast lightgun and go blasting all over again. Of course, you

Take this, you... Hey, no hard Where's he... are to?

Goodbye, Mr Bond!

If you ask us, it's not just the whole Bond style that *Confidential Mission* has – they've even gone and nicked some of the famous Bond villains as well! The similarities between the ones in the game and the ones in the films are quite remarkable...

Goldfinger

> The Fat Bloke in the Museum looks just like... Auric Goldfinger (from *Goldfinger*, obviously). Even an idiot could see the likeness here – they're both short, fat and incredibly ugly. Unfortunately, there isn't a hat-tossing Japanese butler anywhere in sight.

> The Russian Tank General looks just like... Hugo Drax (from *Moonraker*). Snappy dress sense, shifty-looking eyes and a rather bushy beard... the pair look so alike, they could have been separated at birth. Except for the Russian bit, of course.

Largo

> The Agares Ringleader looks just like... Emilio Largo (from *Thunderball*). Well, a bit anyway... okay, so it's only because he's wearing an eyepatch. Other than that, he doesn't look much like him at all. Hey what more do you want – blood?

have to remember that arcade games are meant to be quick-fix action affairs that tempt you to shove in a few pound coins for ten minutes fun, if you intend to bring an arcade game to a home console where games cost £40 rather than just one, you need to provide enough incentive to keep gamers coming back for more... something that Hitmaker has obviously put a lot of effort into achieving in the time-honoured SEGA tradition. Ahh, bless 'em.

Harking back to the days of *Virtua Cop* (the original lightgun game from AM2) *Confidential Mission* switches back from the task of blasting undead zombies to taking care of evil super-criminals intent on ruling the world... along with their vast army of henchmen, of course. Featuring almost every James Bond cliché in the book – perhaps with the exception of driving around in an Aston Martin – you play the part of either Howard Gibson, the smooth tuxedo-wearing secret agent, or his rather foxy female counterpart Jean Clifford, as you attempt to track down

Shooting opposite-coloured enemies stalls them for your team-mate

Take 35, And... Action!

> Play through the whole of the main Arcade mode and you'll be in for a little treat once you manage to blow up the submarine of the Agares Ringleader... ever seen the end of Disney Films like *Toy Story 2* or *A Bug's Life*? Then you might have an idea of what we're talking about – watch carefully as the end credits roll and you'll get the chance to see some specially-crafted 'out-takes' from the making of the game, including Gordon crashing into a window and a whole lot of falling over! Hey, they made us laugh when we first saw them...

Now that we've got *Confidential Mission*, our eyes turn to the next lightgun game on the list... *House Of The Dead 3*. We can't wait!

Of course, there is also *Take The Bullet* but sadly we don't think that will ever appear. Not in our lifetimes, anyway...

Not that SEGA has announced that the game has been canned – since we've only seen two screenshots in a year though, it seems pretty obvious.

Mission: Totally Possible

> Although there aren't exactly any alternate routes to take, you'll get the opportunity to fight your way out of tricky situations at various points during the game. Every now and then, you'll be set a task to complete within a strict time limit – if you succeed, the game will continue on as normal. Of course, failure results in some serious trouble... It could range from having to take on a whole swarm of snowmobiles to being unable to see your enemies properly or even failing the mission entirely and letting the bad guy escape! These make for a welcome break in the action... although we would have liked to see the chance to choose which way to go as well!

the leader of the evil Agares crime syndicate. Not surprisingly, this leads you through a number of locations such as the local museum (this week, featuring a display of Egyptian artefacts), a quick ride on what looks like the Orient Express and then finally winding up in the super-secret 'bad guy hideout hidden on a remote island'. Crkey, it feels like all the movies rolled into one...

Shaken, Not Stirred

Having played through other SEGA arcade conversions like *House Of The Dead 2* and *Crazy Taxi* though, you're probably wondering what sort of extra incentive SEGA has provided to prevent you from getting tired of the same old shooting. Well, don't panic – what there is on offer is quite cool, even if some of it is a little on the predictable side. First up is an all-new Training mode, featuring a variety of tasks that test your skills, everything from timing your shots and scoring Justice Shots to hitting enemies with Combo Shots and keeping the innocent people alive. You'll get the chance to try your hand at these tasks in both training and 'live-action' (or in-game, if you want to be picky) situations, so there's quite a bit to it.

Complete all of the training sections and you'll unlock the Another World mode. This is a variant of the Arcade mode where the enemies appear in different places, and the camera takes you on a slightly different route around

each level. While this isn't that big a deal, it's still enough to inject some variety into the game. Then there's the Partner mode, where two players have to work together in order to beat the bad guys, you can only shoot enemies of your own colour (red or blue respectively) so being alert is essential. There's even an option on the main menu that allows you to connect to the official Confidential Mission Web site and download new missions... once you've managed to complete the original ones, of course.

The Spy Who Loved Me

Considering how many good things there are to say about *Confidential Mission*, you're probably wondering why it didn't manage to scrape into the 90 per cent category. The reason is that despite being great fun and looking wonderful, there is a major gnpe. What is it, you ask? Well, it's that the main Arcade mode is over a bit too quickly for our liking. Yes, the levels are reasonably big but when you consider the fact that you don't get the opportunity to change the route that you take through each stage, the basic game really is rather short. Only three stages? *House Of The Dead 2* had six, and even then most of the

levels had at least two different routes to take through them which adds up to... ooh, quite a few we reckon. Needless to say, you'll see pretty much all the original arcade game has to offer (along with those wacky out-takes during the credits) in the space of a few days.

Still, there is plenty more besides the Arcade mode to keep you busy (even if that does appear to end a bit quickly as well) and it's this fact alone that keeps us from coming down like a ton of bricks on *Confidential Mission*. If SEGA had taken the route that so many other developers seem to be going down with arcade conversions these days (yes Capcom, we're looking at you) and not made any improvements to the original arcade game, *Confidential Mission* would be an incredibly shallow and disappointing experience. But hey... this is SEGA we're talking about, isn't it? Exactly. That's why we'd recommend *Confidential Mission* as another of those games that is worth considering if you're looking for some blasting fun – especially if you've got a lightgun. In fact, why aren't you already on the way to the shop, eh? What's wrong with you?

2ND OPINION

It was way back in October last year that we first got to the grips with *Confidential Mission* in the arcades, and ever since then we've been working ourselves in anticipation of its Dreamcast debut. So does it live up to our hopes? Well, yes! As far as any lightgun game goes, regardless of the system, this is really bloody good. Okay, so it may not quite have the replay value that you might expect, but it's such fun to play you don't really care. It's non-stop action all the way and you can't argue with that. Plus it looks great, of course. Spies like us indeed.

Yes, there are a few faults here and there, but nothing's perfect. As far as third-person shoot-'em-up/adventure games go, *MDK2* is a shining example of what can really be done with the genre and what can really be done with the power of the Dreamcast. Not convinced? Allow us to explain...

MDK2 has virtually everything you need in a game – looks, style, depth, great characters, story and gameplay to die for. Hell, there's even a dog for you animal-loving folk out there (he might

have lung cancer, but that's not the point). As the game kicks in, you immediately know that you're in for something a little bit cool and a little bit special. Like in *Rayman 2*, there's a training area to start you off where you can get to grips with the controls and learn how to use the sniper-rifle and ribbon chute. Then it's straight into the action and boy, is there a bundle-load of it. It's all aliens, aliens, aliens from here-on in, mixed with a liberal spraying of bullets and throwing of grenades in their direction, along with the odd bit of puzzle solving. Set over nine levels, there's a whole host of killing fun to be had, so you're going to have to set

yourself on 'gratuitous violence mode' if you're going make it through alive. the world is counting on you.

Three's Company

It would seem that this game shines in every area, even more so than Kurt's spangly suit, but where *MDK2* really takes gaining to another level is in the incorporation of a large and diverse array of gameplay. It would have been easy enough to have made all three characters fundamentally the same, but as it is Kurt, Max and Dr. Hawkins all have their own individual style, meaning that there's three times the fun to be had and three times the gameplay. When playing with Kurt, the

Sniping around

> *MDK2* isn't all about running around like a headless chicken... well, not all the time, as there's a great deal of stealth and cunning involved. Luckily for Kurt, he's got a built-in sniper-scope in his headgear which allows you to pick off the enemy without having to get anywhere near them. So now you've got no excuse for missing.

emphasis is on stealth and cunning, with Max it's just plain running around like a rabid dog [oh, he is] firing at anything that dares move and with the chemical-crazy Dr Hawkins, the game's more puzzle-based – well you can hardly go around causing mass destruction with an atomic toaster, can you now?

All three characters hold their own challenges and have their own attractions, which ultimately means that in terms of gameplay, this is one of the most rounded games on Dreamcast – purely on the basis that it covers all bases and is great fun to play. The attraction of running around in the guise of a six-legged, cigar-chomping mutt, armed to the teeth, blowing the hell out of anything and everything really is second to none. As for playing with chemicals, sniper rifles and ribbon chutes, well that's pretty darn cool too. Top-notch all the way then, and it doesn't stop there.

Visually and aurally, *MDK2* is a bed of heavenly delights. The combination of the

two creates an atmosphere that hints at the spookily gothic films of Tim Burton, whilst retaining a comic book ambience à la Dan Dare. The dark aura of the levels, mixed with some eerie light sourcing, creates a perfect background setting for the action, while the animation of the three characters and the aliens is equally impressive. It runs along at a pretty sprightly pace too, plus (once you've got the hang of it) it handles like a dream.

There's nothing worse than a game with frustrating control and so the fact that *MDK2* manages to avoid this problem is a major bonus and makes the game that much more enjoyable to play. The in-game music is pretty good too... well it is when you hear it over the racket that a hundred rounds of bullets and grenades make. Best of all, though, is the hilarious noise that gurgles forth from deep inside the aliens which is nothing short of hilarious, although after a while it can get a little annoying.

So is there anything that this game doesn't have? Unfortunately there is a slight split in the Neoprene suit (only a small one mind) and it's one that seems to plague all games of this genre, so we'd be harsh if we were to hold it against *MDK2*. The fact is that if there was any kind of multiplayer mode there would be nothing wrong with *MDK2*. How cool would it be to run around in a two-player Battle mode, using all the skills and tricks that you'd learnt along the way to pump your friends full of lead?

It would have been glorious, but even as it is *MDK2* is a masterclass in intuitive and enthralling gaming, transcendent among its peers. Forget your Lara Crofts, your Clare Redfields and your Michael LeRois – there's a new king on the hill who's going to take them all to the cleaners and it ain't gonna be a pretty sight. Buy this game or forever be banished to the kingdom of the dead. And that's your final order.

2ND OPINION

So, you wanted graphically lowly games that were from the bog-standard (but often lovely) arcade ports? Well, here you go. *MDK2* is one such title that is refreshingly different and solid enough to make you rejoice that you own a Dreamcast. Moreover, it's also a game that isn't an old PC title which has been shipped out in a frightfully cash-in-edited way. No sorry, it's a proper game that just happens to have a PC brother. Unsurprisingly, we're big fans of *MDK2* simply because there's so much to love about the game. You simply have to own. Do it, do it now! Simon Phillips

Yet another arcade game arrives on Dreamcast, but can it take the pace of console life gunless? Don't ask stupid questions...

Silent

✕ We're a lucky lot really, aren't we? After all, what other games console can boast a ready source of top arcade games just waiting to make their merry way into the world of home entertainment? *House Of The Dead 2*, *SEGA Rally 2*, *Crazy Taxi*, *F355 Challenge*, *SEGA Bass Fishing*, *Virtua Tennis* – need we go on? And now *Silent Scope*. That's what you call quality

Life Through A Lens

However, whereas the likes of *Crazy Taxi* and *Virtua Tennis* came with bucketloads of Dreamcast extras, thus making them a whole lot more than just 'another arcade conversion', Konami has only made what seems like a token effort to make *Silent Scope* bigger and better than its arcade counterpart. Just how difficult would it have been to create a whole new DC-exclusive scenario or even just include the scenario from the arcade sequel? But no, all we get is a new Training mode to add to the already existing Training mode from the arcade version (although it has been updated). In fact, the game is more

like the DC *The House Of The Dead 2* than anything else in regards to extra features, or lack of. But then why complain when the limited amount that *Silent Scope* does have to offer is so damn good?

Get it into your heads now, *Silent Scope* is not your average sort of game. What other game boasts a replica semi-automatic PSG-1 as a peripheral in the arcade and turns you into a professional sniper killer? Anyone? Whereas *THOTD2* and *Zombie Revenge* were all about running around in a zombie-killing frenzy, *Silent Scope* plumps for more of a simulation-styled approach to the action, and for that it's not just highly original but totally ingenious too. The fact that the whole concept lends itself to some incredibly dynamic gameplay, which might come as a surprise, only goes to prove the point.

Super-Sharp Shooter

As ex-Marine Corps super-sharp shooter Bryce Estes, you've been recruited by the US Government in a bid to free the

kidnapped President and his family from a reactionary terrorist group and three of the world's most feared mercenaries - Scorpion, Cobra and Hornet. Can you take the pressure?

Your mission begins in the streets of the city as you go about rescuing the family one by one, before venturing further afield and taking on the hard-as-nuts bosses. As you'd imagine, it starts off pretty easy, but as you trek through the game it gets harder, much harder. Which is where the beauty of the game lies, as no matter how far you manage to get in your mission you will without fail find yourself coming back time and again in a bid to get that little bit further. Addiction doesn't get more compulsive than this.

However, it's not just the main Story mode of the game that'll keep your ass glued to your seat, your trigger finger busy and your eyes on stalks for hours

> *Silent Scope* is undoubtedly an enjoyable game, but it doesn't quite replicate the enjoyment of the arcade game thanks to the lack of the gun. Without it, players who have experienced the arcade game will feel a bit confused and a little disappointed. *Silent Scope* virgins will lap this up, though – it's got a contrived and yet compulsive story line and the targeting and scoring system will mean that players can keep trying to improve their skills almost indefinitely. and hours. Hell no. Just as that mode will keep you coming back for more and more, so too will the extensive Training modes – after all, who got anywhere without a bit of hard training once in a while? If you didn't know the meaning of compulsive gameplay before now, rest assured you will do once you've been sat in front of this lot for a few hours. With the addition of three new Training levels – Farm, River and Cave – all with four separate games, you're going to be hooked. And as you go about beating high scores left, right and centre, this becomes a real bad case of the 'just one more go' syndrome. So be warned – get ready for some late nights. Very late nights

Bullet Through The Head

So, you're thinking, this is all well and good, but how well does it work without the mounted sniper rifle? Well, it might come as a surprise to arcade purists but

the control system actually works really well. You don't get the kind of interaction that you would with a gun, but so long as you have a decent level of hand/eye coordination, there's no problem. As a result the gameplay isn't affected in any game-destroying way and in fact, remains as scintillating as ever – but then, the world is depending on you

All told, there's no denying that *Silent Scope* is yet another dreamy arcade port, even despite the fact that it is depressingly limited in its content. In every respect the game is arcade-perfect. It looks the part, it sounds the part – most importantly, it plays the part – even without a mounted sniper rifle. If not a game that you'll play solidly for months on end, there's no doubt that you will find yourself coming back to it time and again whenever you've got a spare few minutes to waste away... just be prepared to end up there all night.

Unreal Tournament

Big warriors with even bigger guns and more frags than you can shake a stick at – the war of the first-person shoot-'em-ups just got even better...

Much like many other great oppositions in life, be it in gender (ads or lasses), politics (Labour or Conservative) or soap operas (*EastEnders* or *Coronation Street*, obviously), the battle for domination in the world of first-person shoot-'em-ups comes down to two giants – *Quake III Arena* or *Unreal Tournament*. Either you go mad for *Quake* or prefer the action of *Unreal*, for some reason, there seem to be very few people who go for both in this crazy mixed-up world that we live in. While the pair have clashed several times in the past on other platforms, it's been pretty much a one-horse race over on the Dreamcast, so the petty squabbling has been kept down to

a bare minimum. However, now that *Unreal Tournament* is finally being unleashed onto the Dreamcast, it's no longer necessary for gamers to side with one game just because it's the only one available. Believe us, this is going to cause some serious arguments before the day is out...

The Un-Real World

Of course, Dreamcast owners have spent a fair old while waiting (as well as watching the game appear on both the

PC and the PlayStation2 before it) to get the chance to play *Unreal Tournament* on their own consoles. Still, we can assure you that the wait has most certainly been worth it... people wanting some serious bloodshed, heavy artillery and even more bloodshed will be in heaven. For the record though, it's worth saying that if you're expecting a PC-perfect conversion then you might as well give up hope now – unless you're some kind of delusional freak, it was pretty clear from the day Infogrames announced it that the Dreamcast version of *Unreal Tournament* would never live up to its bigger and more powerful PC brother's standards. Mind you, it's a damn sight better to play about the sluggish monstrosity that appeared on the PlayStation2 recently...

"It was pretty clear from the day Infogrames announced it that the Dreamcast version would never live up to its bigger PC brother's standards"

online information

Well, good grief – if it isn't an official Web site that doesn't just resort to bait to information about the PC version, but includes DC info too! Hahahaha!

haven't we always told you that Sony machines are bad for your health?

Fraggle Rock

Aside from a few really irritating omissions that we'll get to in a minute, *Unreal Tournament* really does seem to be a contender for the title of 'Best First-Person Shoot-'em-Up'. To the casual observer, there might appear to be little difference between it and *Quake III Arena* – after all, you just run around an enclosed arena, shooting people like crazy until someone reaches the frag limit and wins the game. Unfortunately, that's the nature of the beast that is the first-person shoot-'em-up genre, but to make *Unreal Tournament* stand out from the rest of the crowd, Infogrames has done its best to keep things fresh by throwing in a mix of game styles.

Along with the obligatory Deathmatch mode (and also Team Deathmatch, which is the regular Deathmatch but in teams... duh), there's also the classic Capture The Flag mode, where stealth and cunning

are just as important as using your gun, and the rather special Domination mode – we love it so much, we've dedicated a whole boxout to it over on page 54. All of these modes offer a different game to prevent you from tiring of simply blasting enemies to pieces... not that we get tired of that, you understand.

To accommodate the varied styles of gameplay, there's also a huge selection of stages to play on, totalling well over 60 once you've unlocked them all. They're not all selectable within each mode – some are specifically Capture The Flag or Domination levels, while the rest are pure Deathmatch arenas – but there's still a lot of arenas on offer, set across a wide variety of locations such as space stations, medieval castles and even the mean streets of the ghetto. Sure, it's true that *Quake III Arena* also had a good variety of levels within which to blast each other, but where it fell down was in the multiplayer mode – the more players you had, the less levels you got to choose from. Clearly, this is a mistake

These days, lighting to get a sun-bonger by the swimming pool is a lot rarer than it used to be...

"Despite assurances that Unreal Tournament would definitely be playable over the Net, Infogrames has removed the option completely"

Make sure you're not too close to any exploding rockets!

Grab the Sniper Rifle, then perform the always wonderful head shot.

If you ever get the chance to pick off enemies while they're fighting amongst themselves, use it! Hey, it's not like we're aiming to get a fair play award here now, is it?

that Infogrames has decided not to make, because *Unreal Tournament* offers all of the levels, all of the time... which is great considering that you don't get bored of the same old levels time and time again.

Who's The Daddy?

However, whilst all this information is good to know, what you're probably concerned with isn't the size of the levels or the different characters available – it's what the weapons are like. After all, the most important thing about any game like this is how big the guns are, because you'll be spending most of your time using them to the extreme. Well, don't panic; in comparison to the weedy weapons in *Quake III Arena*, *Unreal Tournament* offers some rather meaty (and in some cases, totally overboard)

devices of destruction for you to play around with. From the basic Enforcer Handgun – although these become more useful once you pick up two of them – and the impossible-to-use but very messy Impact Hammer to very cool guns like the Pulse Gun and the Flak Cannon, there's plenty of choice and you're bound to find one that you're entirely happy with using 99 per cent of the time. Throw in some total overkill with devices like the Ripper (spinning razorblades thrown at high velocity) or the over-the-top Redeemer (basically a handheld nuclear device) and the whole thing leaves us feeling incredibly happy with the game indeed.

We are, however, just a bit angry at the omission of one of the best parts of the original PC game – the Assault mode. In contrast to the 'lone gunman' style

demonstrated in the regular Deathmatch mode, Assault managed to transform a straightforward blasting frenzy into a more strategic and cerebral game. The crux of the game was a number of mission-based levels, with the goal being to go up against a team of opposing warriors and come out on top, either by achieving your goal (rescue the prisoner, stop the train, capture the boat and so on) or preventing the enemy from doing so, depending on the team that you were on. It was, in our opinion, a damn fine addition to the rest of the game, and enhanced its appeal significantly – so naturally, it's been removed for the Dreamcast version. Why? We'll probably never know... or if we do, it'll be some lame excuse about not being able to either do it justice or squeeze it onto the disc. In any case, it has been left out and

Infoburst

The PlayStation2 version of *Unreal Tournament* has the advantage over the Dreamcast, because it still has the Assault mode in it.

However, the PlayStation2 version also has an immense amount of slow-down, so the Dreamcast still manages to come out on top. Hal!

Of all the weapons in the game, our favourite by far still has to be the Ripper. Being able to slice the heads off your enemies from afar is excellent!

Domination, That's What You Need

> Unlike the rather repetitive modes in *Quake III Arena* (where the goal was always to kill as many people as you could... oh, and that's it), *Unreal Tournament* brings something a little different to the shoot-'em-up table – Domination. For once, the aim of the game isn't to rack up the highest number of frags (although obviously, killing your enemies isn't exactly frowned upon); instead, players are split into two teams of red and blue with a score for each, rather than individual player scores. The goal is to 'dominate' the level by keeping control of certain areas – there are a number of checkpoints dotted around each level that either team can take control of. Although control can change at any time by a rival team-member touching the checkpoint. The more checkpoints you control at any one time, the faster your team's score increases, and the first team to reach the target score is the winner. Although blowing people to smithereens is always nice, it's good to get your teeth into something a bit more strategic for once...

"Unreal Tournament offers some rather meaty (and totally overboard) devices of destruction for you to play around with"

that's something that really makes us feel just the tiniest bit disappointed.

Quake III, My Arse!

Other gripes that should be brought up are those that seem to come around simply because of trade-offs made against keeping the game running smoothly. The graphics, while consistently decent, aren't quite as hot as they could be (after all, we've all seen what *Outrigger* is looking like on the Dreamcast and that's only preview code) but this was most likely done out of necessity rather than sheer laziness. What's more, playing the game with multiple players on one machine seems to restrict the number of bots you can bring into an arena at the same time – anything from four against two human players to only two when four people are playing at

2ND OPINION

Suggest there we were getting all excited about another stunning online shooter and *Unreal* looked to be the puppy. Alas, just five days into the online play option was dropped at the eleventh hour. Given that the average amount of time Dreamcasters play *Quake* online is a mere 30 minutes, this shouldn't be too much of a problem, but it's a shame nonetheless. However, it is a top first-person shooter and much more enjoyable/payable than *Quake*, so I would heartily recommend that you get yourself a copy so you and your mates can enjoy a nice spot of fragging... *Steven Phillips*

Loses out on beating *Quake III Arena* simply because they dropped the online play. Why?

once. This seems weird considering you can have up to seven other bots running around the place during the single-player game, but we can understand the necessary sacrifice if it was to keep the speed of the game up... although there's still a noticeable drop in speed when you've got six people all springing around the same level together.

The one thing we can't possibly understand, though, is the decision to drop the online play option. Despite assurances that *Unreal Tournament* would definitely be playable online throughout its development, Infogrames has performed a complete U-turn and removed it completely. The reason? They wouldn't say - rather than trying to make excuses, the Infogrames folk simply said that they couldn't talk about it. We sense a major SEGA conspiracy afoot...

And this, dear friends, is the one reason why we just can't bring ourselves to recommend *Unreal Tournament* over *Quake III Arena*. In truth, we actually feel that the wide selection of weapons, varied game modes and massive selection of levels gives Infogrames' offering the edge. However, without the option to play the game against people on the Net as it was originally meant to be... well, it's only half the game it could have been. It's a sad fact and one we can't really ignore, hence the 'three per cent lower' mark. Basically, you need to ask yourself what you want - if you're looking for an incredibly good first-person shoot-'em-up to play with your mates, get *Unreal Tournament*. If, however, you're looking for a spot of online play, you're only really got one option.

Martin Mathers

You've Got To Accessorise...

> Don't be fooled into thinking that brute strength is the key to being the best in *Unreal Tournament* - it's not just about picking up the biggest gun and going for broke, you know. The smart *Unreal Tournament* player takes the time to grab as many other useful items as they can, making sure that they've got at least one backup plan should things go awry. Example? Well, it's only common sense to make sure you get your hands on any Body Armour that's lying around - anything from Tilted Pads to the full-on Shield Belt provide resistance to enemy bullets - and it also goes without saying that Health items of any kind should always be collected. If you're really good though, you'll find yourself some Anti-Grav Boots (useful for up to three huge leaps through the air) or even the Translocator... perfect for when you need to get out of an area immediately.

Amazingly, the home version of the game is actually better than the arcade!

Alternative paths mean that the game is different every time.

There are plenty of extra modes to keep you coming back!

People with a reasonable memory will remember the original game in this series, called (rather obviously) *The House Of The Dead*. This saw two agents called to a

mansion in the middle of nowhere to investigate a 'disturbance' and the activities of Curien, a brilliant but eccentric scientist. In actuality, *THOD* was a fantastic continuation of the theme set

by SEGA's top lightgun game *Virtua Cop*, and finally gave the people what they wanted – blood, and lots of it.

The sequel kept over everyone's expectation in the arcade with massive enemies

PLAYING WITH THE BIG BOYS

So how well have SEGA done in transferring this huge game to the small screen? The phrase that is commonly over-used in situations like this is 'arcade perfect', even when the game clearly isn't. Well, let's try something new... how about 'arcade superior'? That's right - the Dreamcast version of *THOTD2* is actually better than the arcade version in almost every way. You'd have thought that when it comes to

gun games, there's not much you can do with it. Slap in the arcade mode and a couple of extras and that's about it. WRONG! Once again, SEGA have pulled all the stops out to make this packed tighter than Melinda Messenger's brassiere - there are so many bits and pieces to play that it'll be a long while until you even consider putting this little puppy down.

Wearing his little black leather mask, you'd think he's some kind of glimp. Don't say that to his face though or you're likely to feel the business end of the power chainsaw he carries around with him!

Magician

Oh no! You thought you killed him during the original *House Of The Dead*, didn't you? Well you were wrong! He's back and he's twice as dangerous as before - don't get scared, just shoot him!

Emperor

Even G's diary has little information about this ultimate enemy. He's big, scary and has a habit of turning his liquid metal body into nasty sharp spikes and balls to hurt you with. Gulp.

In order to make things more interesting SEGA have included a 'special edition' of the Arcade mode"

Arcade Superior

Take a look at these two screenshots – the one on the left is from the Dreamcast, and the one on the right is from the arcade original. If you look carefully you can see that the Dreamcast game has actually been developed further than the arcade with new detail in the background. It's not often you can say that the home version is better than the arcade original!

retained, so by shooting different zombies or (God forbid) innocents, you can make the game different every time.

In order to make things more interesting SEGA have included a 'special edition' of the Arcade mode – Original

mode. This plays the same as its twin but with the addition of special items to collect along the way. While some are placed in clear view, others are hidden behind crates, doorways or gratings and it's up to you to find as many as you can. Once you've got them, they can be accessed in a menu the next time you play and can drastically alter the way you play the game. Imagine having infinite bullets, energy or credits, using a paintball or machine gun or even taking on the zombies as Goldman himself!

Although you can play the game with a joystick, you won't be able to achieve the total arcade experience until you hold a gun and actually aim it straight at a zombie. The game can come packaged with the SunSet lightgun for a mere £20 extra which we strongly recommend you take advantage of. Not only is it an incredibly accurate peripheral, but it is light and comfortable to hold. When you're out of bullets point away from the screen and shoot. It's also possible to slot the VMS into the gun and view the LCD screen whilst you play.

If this is not enough for you however, add a Jump Pack to get the real sensation of taking a shot and feel the recoil on the gun as it fires. We guarantee you'll be hiding behind the sofa!

Quick Draw McGraw

You've also got some extra Training modes to help you tune up your firing abilities for the main game. There are

ten main training games, with five difficulty levels in all, each calling on different approaches to be used to clear them. As you pass a certain level on each section the next one opens up and they range from saving innocents, taking out zombies at an incredible distance or even shooting a coin repeatedly to keep it up in the air for as long as you can!

The Boss mode is also available for people wanting to practice beating them and again, more options open up once you pass a certain level. Do you think you've got what it takes to take on ALL the bosses in one go?

In the long run, there are minor gripes with the game. If there's one complaint that people are going to have with *THO2*, it's got to be the arcade factor. Arcade games (and in particular, arcade gun games) are designed specifically to have a high 'quick-fix' appeal but little in the way of long-term stability. As *THO2* is a direct arcade-to-home conversion, this comes across somewhat in the gameplay. All the bonus extras, added game modes and other goodies make up for this 'one-minute wonder' problem but the main arcade game could quickly become a chore, despite the multiple routes in the game.

That said though, this shouldn't be a problem to fans of the genre as well as those willing to expand their mind and experience a true quality title.

This is one of a few titles worth owning a Dreamcast for on its own, especially with the amazingly good lightgun to play it with – blast some zombies today! **Martin Mathers**

Dreamcast opinion

THE JUDGEMENT

GOOD

- Better graphics than the arcade original
- More modes of play
- Excellent for people like me
- Multiple routes through the maze

EVIL

- Shooting of scenes is not quite as satisfying
- Arcade conversion is a little shallow
- The bonus area is not very easy

2ND OPINION

I agree with Martin in that arcade games might look really great on the Dreamcast, but the gameplay has been set up for the 'quick fix' arcade mentality and not the home console where we expect more. You'll find yourself playing the early levels of *The House of the Dead 2* over and over again, which is never a good thing. This doesn't mean that the game isn't worth buying though. It's a really good blast with jaw-dropping visuals and adrenaline pumping action. **Nick Roberts**

Better than the arcade in many respects, but can it's a gun game it has a slightly shorter shelf life.

Apparently, in space no-one can hear you scream... unless of course you're the pilot of a Coalition starfighter, in which case you'll manage to shout: "No, please... NO!" over your radio for everyone to hear. In fact, that's what they all scream - either that or something along the same lines before exploding into a million atoms. How do we know this? Well, because we've been playing *StarLancer* pretty much constantly since a copy slid its way into our Dreamcast this month. It's not because we've been into outer space... at least, not recently.

Originally released on the PC a few months back, the Dreamcast version of *StarLancer* has had a bit of a troubled past - what you've actually got here is a Ubi Soft release of a Cave conversion of a Warhog game. Confused? Don't worry, it's not exactly important. All you need to know is that if you're into action-packed

shoot-'em-ups that look gorgeous and play like a dream (as well as having a top-notch story line to boot) then not buying yourself a copy of *StarLancer* is a really big mistake. Oh, and then there's the fact that you can go up against five other would-be fighter pilots in a variety of online deathmatch frenzies... did we forget to mention that?

Die, Capitalist Pigs!

Considering that *StarLancer* is set way into the future and we're supposed to have become a peaceful world by then (at least, we are according to *Star Trek*) there are rather too many stereotypical enemies in space for our liking. The Western Alliance - basically us and the Americans - has come under attack

following the colonisation of Mars and preparations for exploring the galaxy from the Eastern Coalition... so that'll be the Russians and other 'commie b'stards' then, if the game is to be believed. To cut a long and rather obviously nicked-from-the-archives-of-the-Imperial-War-Museum-story short, they're winning and we're losing. Hence the reason why you've been drafted up to join the 45th Squadron and fight the good fight - all in the name of capitalism.

What this breaks down into when you actually sit and play the game is a whole series of mission-based outings from your base ship, the Reliant, to solve the Alliance's problems. Ranging from protecting Allied convoys and searching through the rubble of destroyed ships for

"There are so many great things in *StarLancer* that we're at a loss for where to begin praising it"

There's nowt quite like the smell of exploding Coalition starships in the morning...

Stay on target, stay on target... oh, hang on, that's Star Wars, isn't it? Bigger.

Extra information

Ubi Soft ended up publishing *StarLancer* for the Dreamcast after it bought out Crave... that means it's releasing *Ultimate Fighting Championship* as well!

The creators of *StarLancer* are Erin and Chris Roberts, the same duo that came up with the idea behind the epic *Wing Commander* series.

The story line actually develops depending on how you play – the better you do, the quicker you'll be able to get your hands on those superior fighters...

Another one bites the dust – keep this kind of performance up and you'll be in line for a promotion soon, matey...

items, to destroying enemy bases and even trying to take out an entire Coalition space station, you won't have much chance to take a breather considering the amount of blasting you'll need to do. What's more, none of the missions ever seem to go according to plan – you'll be happily flying around on routine escort duty when a whole pack of Coalition fighters will jump in out of nowhere and totally change your objectives. It's that element of surprise that'll keep you on your toes and eager to find out what happens next...

I Will Be Avenged... No!

There's no denying that *StarLancer* is a very special game. The problem, though, is how to start the praise – there are so many great things about it that we're at a loss for where to begin. Right from the start, you know you're about to experience something wonderful simply

Say Hello To My Little Friend

What's a space combat simulator without a massive selection of craft, laser cannons and missiles to check out? Nothing, that's what. Thankfully, *StarLancer* is packed to the rafters with them (if you can get rafters in space, of course) and offers a whole host of death-dealing weaponry with which to punish those nasty Coalition types. You don't get it all to start with, though – the better you fight, the higher you'll be promoted and only then will you get to fly top-notch ships like the Wolverine. Mmm, Wolverine. Now that's a spicy meatball of a craft...

I'll Name That Game In One

If we were to tell you that our favourite game at the moment was a 'space epic pitting the heroes of the Alliance against the villainous Coalition in top blasting combat'... well, you'd be forgiven for not knowing which game we're talking about. Indeed, there are quite a few games out there like *StarLancer* - check out the dopplegangers.

Bang! Gunship Elite

We had to wait ages for this and it turned out to be a stinker. We've got *StarLancer* though, so we don't really care any more.

Wing Commander

Of course it's like *StarLancer* - it's by the same people, dumb ass. *Wing Commander* came along years ago, so there goes that idea.

Elite

Okay, now you're just getting it. It's the mother of all space flight sims - how could it possibly rip off *StarLancer*? Exactly.

Now you're not even trying... the enemy is over there, dumb ass!

"StarLancer most certainly manages to jump ahead as one of the killer apps for online gaming on the Dreamcast"

Wahwahwah! Oh, you evil space-riding scum... that'll teach you for stealing my maroon paper!

because of the level of polish that has been put into the presentation. Everything looks fantastic, from the FMV and opening briefings on your current mission to the in-game space battles themselves. Then you've got the incredible detail of all the ships you'll encounter, the intense action and excitement found during each mission, even your fellow wingmates and enemies talking to you via the cockpit video link... believe us, once you experience the whole thing you'll never be able to settle for anything less again.

What's even more shocking is how Warthog has managed to translate the immense number of controls and options from the PC game onto a single Dreamcast controller. Although use of a keyboard is possible (handy for those used to the layout of the PC version) it's quite easy to get to grips with the different combinations on the controller - firing on the A and B Buttons, speed controls on the triggers and targeting and ship systems being a mixture of the

Forget having to remember all those complicated button functions... It's easy with StarLancer. Really, it is.

X,Y and D-Pad buttons. It sounds really really complicated but we promise it isn't... honest, guv.

The Online Frontier

The biggest surprise, though, has to be how well the online multiplayer game actually works. After the 'one second delay, get used to it' problems of *Chu Chu Rocket*, and minuscule lag on *Quake III Arena* that made it incredibly tricky to actually hit people, *StarLancer* is an example of near-perfect online play. It's even got the edge over the other online titles by supporting more than just four players at the same time. Finally, it looks as though Sega is able to take one step closer to that promised six billion, if only by two players. The only real complaint we'd have to level at the online side of things is the removal of the Co-operative mode – being able to play through those single-player missions with a whole squadron of online buddies as you could on the PC version would have been great. Unfortunately, it isn't meant to be

on the Dreamcast... of course, being able to blow five of your friends to smithereens from your own armchair is enough for most. Basically, you won't miss it if you haven't experienced it...

And that's the whole case with *StarLancer* on the Dreamcast. If you've been lucky enough to sit down and play through the original PC version of the game, you'll easily be able to point out all the shortcomings of the Dreamcast conversion. However, all the things that are missing were only really window-dressing anyway – if you're coming to the game for the first time, you won't even notice that they're absent. Although it's not quite as big a name as *Quake III: Arena*, *StarLancer* most certainly manages to jump ahead as one of the killer apps for online gaming on the Dreamcast, whilst also managing to include a whopping single-player game into the bargain. It's recommended with a capital R... and all the other letters as well, just to be sure.

2ND OPINION

Hurrah! hurrah! hurrah! hurrah! At last, a game that is actually worth playing! There's no racing involved and what's more, there's nothing like it on the Dreamcast. Can it get any better? Well, yes. The online gaming experience is pretty cool, it looks amazing and if you've ever watched *Star Wars* and wanted to have a go at flying spaceships, protecting convoys and the like then this should be right up your alley. It might not be the game on everybody's lips but it should be a game in every Dreamcaster's collection. Hang along and buy, you won't regret it! Simon Phillips

The man behind the game, John Mullins, worked as a real-life mercenary between 1981 and 1990 after leaving the US military.

His experiences ran the gamut of military affairs, ranging from VIP protection to asset recovery, and sending him as far afield as the Middle East, South America and Afghanistan.

Mullins is also the author of a novel, *Days of Fire*, which was published in 1991. He also has plans for other titles to be printed in the future.

The awards Mullins won in the military include the Silver Star, the Bronze Star and several Purple Hearts.

Soldier of Fortune

Load your weapon, take the safety catch off and get ready to make one hell of a mess of anyone that stands in your way...

When first released on the PC a little over a year ago, *Soldier of Fortune* caused quite a stir with the incredibly gory nature of both the visuals and gameplay. The excellent graphics coupled with the use of 'gore zones' on the bodies of characters meant that it was possible to shoot an opponent in the arm or leg (sometimes blowing it clean off), leaving him screaming in agony, before putting a bullet in his head. And if you were feeling particularly twisted it was also possible to pick up a knife and make a mess of the body too.

Mindless Mutilation

Now Dreamcast owners can also indulge in the kind of mindless mutilation that had the PC gaming fraternity in such a

tizzy, for *Soldier of Fortune* has now arrived on SEGA's little box. Complete with a 'proper' BBFC 18 certificate, the game has managed to make the transition remarkably well - proving once again that the Dreamcast is alive and kicking regardless of what the critics might say. Even better, it weighs in at the bargain price of just £20.

The game is based around the story of a mercenary called John Mullins, and follows him around a series of contemporary and familiar settings ranging from New York to Iraq. Mullins is actually a real-life soldier who worked as a consultant on the game, and his impact has clearly had a major effect on the look and feel of the finished code. That said, it is clear after playing for five minutes that realism is

only applied where it is compatible with fun and excitement; this is a shooter that is more akin to *Quake III Arena* than *Rainbow Six*. One shot does not mean instant death, and the tactics you are encouraged to use often involve heading charges into rooms full of enemies - not the kind of thing that the military are likely to encourage in real-life training.

Fun And Playable?

Instead of staying within the confines of reality then, Raven has gone to work creating a fun and playable blaster that uses realistic weapons but doesn't hamstring the player with the kind of restrictions that too much realism would bring. This is a shooter that will get the adrenaline pumping, and one that requires lightning reflexes more than tactical nous.

Graphically and aurally, *Soldier of Fortune* is a laudable achievement ably demonstrating the Dreamcast's ability to handle PC conversions with relative ease.

Ahh - fat, bloated and dead on a toilet seat. Just like Elvis Presley... nice.

Shoot some red barrels and... boooooom!

The level of detail on the characters is quite impressive and this is matched by gameplay that sees you able to kneecap opponents or take them out with a headshot depending on where you hit them. "Graphically and aurally, it is a laudable achievement, ably demonstrating the DC's ability to handle PC conversions with relative ease"

Weapon Of Choice

The modern mercenary has a number of fascinating ways to get rid of him in his way – and each seems to be even more gory than the last. Sit back and marvel at the ways you can kill people, with our selection of the weapons available in *Soldier of Fortune*.

1 The Knife

Knives can be used for much more than eating your dinner with. *Soldier of Fortune* allows you to use the humble knife both as a stabbing weapon for close quarters killing, or to throw at distant enemies.

2 The Shotgun

There are few things in life as joyous as unloading both barrels of a shotgun into the face of a bad guy from close range. Messy and not too accurate, but by jove it's fun! Not one for the squeamish though...

3 The Sniper Rifle

The sneaky buggers out there will like this particular choice of weapon – it allows you to pick off bewildered enemies from a distance with incredible accuracy. Take them out and move on...

4 The Machine Gun

When it comes to taking out rooms full of bad asses, you just can't go wrong with a good old-fashioned machine gun. In terms of sheer deaths per second, it's hard to fault it. Results every time.

5 The Microwave Gun

Fictional (unless you're a conspiracy theorist) but fun, this is the most lethal weapon in the game and God help anyone who gets in your way while you have one... they genuinely won't know what's hit them.

Come Play With Me

Soldier of Fortune is yet another game that could have made a great multiplayer experience. The PC version was Internet compatible and was much more enjoyable as a result, but it seems that Dreamcast games developers can't be bothered to implement multiplayer options for more and more games. There was uproar when the multiplayer options for *Daytona* were axed at the last minute but it appears to have fallen on deaf ears. Since then, *Unreal Tournament* was released without multiplayer options, despite being brilliant on the PC over the Net and now *Soldier of Fortune* joins the list. Perhaps when the Dreamcast is remembered in years to come, people will realise just what an opportunity they missed with it – but by then it will be too late.

face from point blank range and recoil as his brains decorate the room, or use automatic weapons to blast limbs from would-be assailants. It is easy to see why the game courted controversy on the PC – and why it has been awarded that 18 certificate this time around.

Fortunately for you, there is a plethora of death dealing weaponry available, which comes in most handy when firing back. These range from the simple knife through to more sophisticated weapons such as the shotgun, sub-machine gun and sniper rifle. There is even a fictional microwave gun with which to deal out death and destruction, and all these weapons can be bought between levels. Being a mercenary you earn cash, you see, and the better you do on each level, the bigger the pay packet awaiting you at the end of it all. The more money you have, the better weapons you can afford

Blimey, it's Saddam Hussein himself! What's he doing there?

Muttus had a quick break to catch up with Eastenders.

She should have met me in Winyg two hours ago... where the hell is she?!

Simple market forces dictate whether or not you have to knife someone in the back or blow their head off their shoulders from half a mile away – a much more interesting demonstration than an economics lesson.

Pumping Gameplay

So, with pumping gameplay, admirable graphics and sound and some truly quality gore, you may well be wondering why there's no 90%+ score. The fact is that the world is by no means perfect. If it was, we'd be sipping cocktails on a Caribbean Island whilst watching a mud wrestling bout between Gail Porter and Kylie Minogue. The sad fact is that we're not. The world is not perfect, and neither is *Soldier of Fortune*. To begin with, the game is populated by some of the dumbest enemies ever to grace the Dreamcast. Marvel as you can take three

or four shots at them without them reacting, and laugh as they blunder their way into the path of your guns with incredible frequency. Bad guys, it seems, are not members of the self-preservation society. Also incredibly frustrating is the length of the loading times – it seems that you spend more time waiting for new areas to load than you do playing through them.

But the game has another major flaw that prevents it attaining true greatness. First-person shooters are very much like football and sex in one important respect – they are all far more enjoyable if there is more than one person involved. The biggest problem with *Soldier of Fortune* is the fact that there is no multiplayer

whatsoever, and this is a crying shame. The single-player campaign does offer a decent enough challenge but a bit of four-player action would have added greater longevity. One of the Dreamcast's biggest selling points was the use of the Internet for a console, but the lack of multiplayer support for this is bewildering. Remember the adverts? Six billion players? Not much use if people don't make games that can be played over the Net. This is a fatal flaw in *Soldier of Fortune*'s make-up. With online/multiplayer options this could have been one of the all-time classics but as it is it remains simply a great game with missed opportunities.

At last! We'd begun to think that *Soldier of Fortune* had gone the way of *Half-Life* and *Legacy of Kain 2*, but now it's finally come out. What's more, it's actually a damn good game. Irate, the fact that the enemies don't make much effort to get out of the way (are they just asking for it or what?) or the lack of online and multiplayer options are a bit of a downer. Still, when you're only paying £20 for what is a fine blasting experience – complete with all the blood and story line you could ever want – you can't really complain. Martin Mathers

Face Ultimate Characters

To fight against Akuma, Morrigan and

Nakoruru in the main game, you need to beat the game a number of times before their shadows become available in the Secret Shop - once to unlock item 62 (Akuma) with all the Capcom characters to open item 63 (Morrigan) and with all the SNK characters to get item 64 (Nakoruru).

Once you've bought the items, play through the main

game again and reach the end of the third bout without losing, with over 60,000, to face either Morrigan or Nakoruru. To face Akuma, you need to reach the final stage with over 80,000 - it's certainly not easy!

Unlock More Backgrounds

To be able to fight in one of five new locations, just beat the characters that each background represents in the main game (M Bison, Geese, Akuma, Nakoruru and Morrigan) and then buy each one as items 65 to 69 from the Secret Shop. To access the final Thailand stage, you have to play through the main game until you reach it randomly - only then will you be able to buy item 70 from the Secret Shop.

Unlock Morrigan

To access Morrigan as a playable character, you need to have bought ALL the Capcom EX characters and also have beaten her in the main game by buying item 63 from the Secret Shop. When you've done that, item 74 will be available - she costs 8000 VS points.

Unlock Nakoruru

Unlock Akuma Long

To access Akuma as a playable character, you need to have bought both Morrigan and Nakoruru from the Secret Shop. When you've done that, item 75 will be available - she costs a whopping 9500 VS points!

Marvel Vs Capcom 2

The biggest and best fighting game from Capcom has also got some rather storming little secrets hidden away inside it. Here are a few pointers to get you going in the right direction!

Switch Character Order

When you pick your three characters at the start of the game, you don't have to keep them in the same order. If you want a character other than your first selection to begin a fight, you can do it - just hold down the L button before a fight to start with your second fighter or the R button to begin with the third character.

Alternate Costumes

In order to change the costume of your chosen character go to the Character Selection screen, then highlight a fighter and press A or Y rather than X. Remember that you won't be able to change costumes if you haven't bought them for that character!

Cheaper Hidden Characters

Don't like the price that a hidden character you want to buy is offered at? The prices change every time you visit the Shop - just keep entering and enter the Shop screen until the price of any hidden characters is slightly more reasonable.

Power Stone

The World Of Power Stone

Finishing the game with each-character opens up a different page in the World Of Power Stone book (found in the Collection menu on the title screen). Each page contains a new option or item that can be used either in the game or on your VMS and is usually selected by highlighting the page and pressing the A button. Here are a selection of the new goodies that you can access in this way.

New Fighting Items

The first four times you complete the game will open up the front four pages of the Power Stone book. These contain new items that will appear at random in the fighting arenas if you turn them on in the Options screen. In order of appearance, the items are an Extending Kendo Stick, a Gatling Gun, an alien ray gun and a shield - while carrying the shield you will be invincible to attacks but will be unable to attack yourself.

Virtual Mode

Complete the game as Kraken and the Virtual mode appears on Page Five of the book. This is a normal one-player game with the exception that it turns the whole fight into a first-person perspective, making winning that much tougher!

Dual Virtual Mode

This option appears on Page Six of the book when you complete the game with Valgas. It is similar to the one-player Virtual mode only it allows two people to play in a split-screen, first-person perspective fight!

Play As Valgas B

Complete the game on any difficulty level but without using a continue. Now check Page Twelve of the Power Stone book to be able to play as the super-powerful Valgas B that appears at the end of the game. You can only use him in VS mode and even then only one of you can choose him per match!

Watch Endings

Each time you finish the game, a new character ending will be added to Page Fourteen of the Power Stone book. Choose this page in order to watch any of the endings for the characters that you have managed to finish the game as.

Extra VMS Games

You will open up a new game that can be downloaded into your VMS when you complete the game for the fifth, sixth and seventh time. You will need a totally empty

VMS to download the game into - playing these games will earn you points which can then be used in order to get more pages of the Power Stone book! In order of opening the games are Fokker's Flame Chase, Agame's Ninja Star Throw and Gunrock's Slots.

Quake III Arena

It's only just coming out and we've already managed to find out how to unlock the cheats in this amazing first-person blaster. Are we great or what?

Unlock Cheats

Play through the game and complete it on any of the five difficulties - as a reward, you'll receive a special VMS game to play. Once you successfully complete this you'll unlock one of the cheats in the game (you can access them from the Cheats menu on the Pause screen of the game). You'll get a different cheat depending on which difficulty level you originally completed the game on, so to unlock them all, you will have to finish it on all five levels. Uh, oh!

Courses

Desert SS1

Best car: Lancia 037 Rally

The first Desert course is one for beginners and is a great place to practice your powersliding. There's a good long straight where you can reach a high speed and two shorter ones which are sadly spoilt by the crests in the road - if you're good you can use these to overtake competitors by flying over their cars!

Choose the right car and you can drive most of this course by sliding from left to right - remember to watch out for the graffiti as you slide by! The other major factor to take into account here is water - avoid this when the co-driver warns you it will slow you right down and you'll lose that high ranking!

Desert SS2

Best car: Peugeot 205 Turbo 16

This desert course is a bit tougher than the first, with long sweeping bends in the road and some tugged sections where you must avoid smashing the car into the rocks. This time the graffiti found on the sides of the road are joined (wouldn't you just know it!) by a road!

Starting out in a small town area the desert sand is soon left behind and replaced by more of a muddy surface which will make your car slide more than usual. Avoid the sides of the road as water tends to collect here more than the centre - and always try to make jumps as fast as you can, you can then

sail over many obstacles!

Desert SS3

Best car: Alpine Renault

With a five star difficulty rating things are already a sliding to tougher up. This doesn't have a single straight where you can overtake, you'll have to do all your passing as you slide by other drivers on the corners. The entire course is twists and turns, more of a snake than an 'S' slalope!

The desert heat has evaporated all the water on this course, but it has also had the effect of making it very dusty and dust can also slow your car down. Watch out for rows of barriers along the side of the road early on - hitting them will send them flying, and lose you speed. The 'K' turns and hairpins are the longest manoeuvres you'll have to make here - hit the brake slightly just before the bend and keep your finger on the accelerator to power through them.

Mountain SS1

Best car: Lancia 037 Rally

The rocks of the desert have been replaced by trees, but the handling is pretty much the same when the course breaks away from the tarmac and goes into the gravel. The first mountain course has a long section of dry lofts which give you a good overtaking opportunity there are no really sharp turns

either so you can keep the speed high. Make sure your car is kept perfectly straight when the co-driver shouts out 'Crest Jump' as the car will undoubtedly leave the ground and could crash if you take it on a slant.

Mountain SS2

Best car: Lancia 037 Rally

These mountain roads are lined by stone walls and these are further narrowed by two bridges, so there isn't much room for making mistakes. The second course doesn't have much in the way of straights, it's very winding so again you'll have to overtake as you slide by your opponents.

The road surface is a mixture of gravel and tarmac. You will find that your car has good traction on the tarmac sections, but you'll have to watch for skidding when you burst into the gravel - the co-driver will warn you, so be ready! Just after the checkpoint be ready with the brakes too - you'll very soon be confronted with a hairpin right turn!

Mountain SS3

Best car: Lancia 037 Rally

This course is much shorter than the other two, but with sharp turns all the way through it's a test for even the best drivers. The first thing to watch out for is the 'K' left turn directly after the starting line. The

course is blocked off, forcing you to go left and you'll need to slap the brakes on and slide the car into the corner to get maximum speed. There are two more corners like this in the course!

Another major problem on the mountain courses is the width of the road. There is little room for overtaking manoeuvres most of the way around – you'll have to take your chances when you see an opportunity.

Snowy SS1

Best car: Mitsubishi Lancer Evolution IV

There are a couple of major problems facing you in the Snowy courses – the ice on the road and visibility. When you're about to enter a particularly nasty area of ice the co-driver will shout it out to you – make sure you don't make any erratic movements through this section. As for visibility, the fog is really thick in places, but all the other cars have to cope with it too!

This first course is very short compared to the ones raced already. Use this beginner's snow course to get used to the loss of traction as the cars slide around in the snow.

Snowy SS2

Best car: Mitsubishi Lancer Evolution IV

Part of this course is actually tunnelled underneath the mountain, but this doesn't make any difference to driving conditions except that it can't snow in a tunnel! Surprisingly stretches of road are completely snow free around this course too – the snow patches must have been out here!

There are a couple of good straighties on either side of the course. If you can approach a competitor in a straight line, use these for overtaking – but watch out as they could be sliding around in the snow too! It's very easy to get stuck on the sides of the course in the snow. If you do, let go of the accelerator and get off the bank before trying to continue.

Snowy SS3

Best car: Peugeot 306 Maxi

This is by far the longest of all the Snowy tracks and it's packed to bursting with twists and turns. Make sure you take a look at your tyre set-up before tackling this one, and have tyres that will stand some serious punishment and give good grip in the snow! As you should know by now, the snow causes one major problem – if you drive your car onto the ridge at the side of the road you will get stuck, and seriously spoil your chance of a fast lap time. If this happens, let go of the accelerator until you're back on the main road, then let up once more.

Riviera

Best car: Lancia 037 Rally

The Riviera section of SEGA Rally 2 is unique for two reasons. One, it's the only course that a permanently set at night. Secondly it doesn't come in three parts – there's only the one course to master. It's got a five rating for difficulty though – and the tight twists and turns are certainly a challenge for even the most experienced drivers.

Your first horror comes at the end of the first straight – a sharp hairpin right-hand turn. Slam the brakes on to slow the car down and throw it around the corner, then put the power back on to drive out of the bend. The next section has a couple of twists, and then there's a second hairpin as you come back towards the checkpoint. There's only one checkpoint on this track, so in Arcade mode you will have to go around twice! Interestingly, there are two cones positioned just before the finish line. Knock them down in sequence when playing in Arcade mode and you open up a secret area of the track where you can knock over cones for points!

Muddy SS1

Best car: Peugeot 205 Turbo 16

The first track in the Muddy stage is a good mixture of bends and straighties giving ample overtaking opportunities as you're racing around. It's not too tricky to drive around, only having a two star difficulty rating. Your main problem in this track (surprise, surprise!) is the mud! It acts in a similar way to snow, giving a slick surface under the wheels and causing your car to slide more than it would normally on each corner. Watch out for the handful of barriers that are placed in strategic places around the track too – knocking them over is fun, but will slow down the car.

Muddy SS2

Best car: Peugeot 205 Turbo 16

More slipping and sliding around in the second of the Muddy courses and this one has some very nasty surprises in store for all boy racers out there! As you accelerate away from the starting line, you'll find the road ahead blocked, and a route through to the left. If you don't slow down in time your car will smash head-on into the barriers and really spoil your chances of a high score. Also, keep a look out for the K-Left, K-Right bends in the road – these take a lot of practice to drive perfectly, you must slow down just before them and slide the car first one way then the other. Keep practicing!

Muddy SS3

Best car: Peugeot 205 Turbo 16

All three Muddy courses are set around the same island, with new roads opening and old ones closing as you progress. This final Muddy course has similar perils to course two – with roads closed directly ahead of you, but after a couple of laps you will soon learn where these are and be able to anticipate them.

The Open Hairpins that you find towards the end of this course need even more skilled driving. Power on into the hairpin, then let go of the accelerator and touch the brakes slightly while turning the car. You should slide through the first part of the hairpin, then reverse the steering and power back on to take the next Open Hairpin going in the other direction. Again, practice makes perfect!

Isle SS1

Best car: Peugeot 306 Maxi

Do you want the good news or bad news? The good news is that the Isle courses are all rated on nothing but tarmac, giving the cars much more grip and making sure they actually go in the direction you're pointing them in. The bad news is that the roads are so narrow one Sunday driver can destroy an entire race! This first attempt at the Isle has two long straighties that go underneath bridges, the road doubles back on itself after the first to bring you back around for the second. These are your best overtaking opportunities, so make sure you make good use of them.

Because of the narrow nature of the roads here, you must be more precise with your powerslides. You don't have the luxury of the open plains in the Desert courses, so this track is most definitely for the experts.

Isle SS2

Best car: Lancia 037 Rally

The second Isle track is a bit of a cop out in our opinion! Again, the same roads are used again, as in the Muddy courses. But the new section that is opened up here is so small and insignificant, it's hardly worth bothering with! The one thing that has changed is the direction you take the course in – this time we start off in the town and head down over the bridge, then into the new section up on a hill. You can still use the two straighties as good overtaking places, but watch out for the tunnels that lead off the hill, you can hit the side of the tunnel as you go in, seriously damaging it and spoiling your race. The final stretch of the course is the most difficult to drive – you end up twisting and turning through the streets of the town, you'll have to lower your speed through here or you'll hit every wall!

Isle SS3

Best car: Lancia 037 Rally

Once again, the long straight sections of the island are put to good use, but the new section that is opened up is at the opposite side of the island from that in course two. This creates an even longer course with some serious twists and turns that will test your steering skills to the absolute max! You should already know how to drive through the majority of this course, instead of using up your ace cards on the same pieces of road, concentrate your efforts on the twisting mountain road. You will need to make creative use of the brakes or even the handbrake to get through the bends without losing places or slowing down too much. When you pass the finish line give yourself hearty congratulations! This is the last track of the game – try to beat your times!

Shenmue

Okay, so there might not be any cheats as such in this game and we're hardly going to do the whole walkthrough in this mag, but here are some hints and tips for you.

Fight In 70-Percent Battle

Complete the game and then the Clear Data to unlock the 70-Percent Battle option on the Options screen. NB: Disc 3 has to be in the machine for this.

Get Extra Money

The best way to build up your finances is to take the 500 yen you're given each day and then leave the house as usual. Return to the house at any time and go into your room – when you leave it another 500 yen will be available. You can repeat this as many times as you like – in fact you can even become a millionaire.

Against All Odds

To increase your chances of winning on the addictive slot machines, go to the Lapis Fortune teller and choose Gumble. She will give you a lucky number and if you use the

slot machine with the same number your chances of winning will improve significantly!

Silent Scope

We've been able to track down some cool codes for this one, but they're not so much cheats as some bonus extras - enjoy!

Scopeless Mode

To play the game without a scope press Right, Down, Right, X, Up, X, X, Y, Down, Right, Down, Right, X, Y at the Mode Selection screen

Invisible Enemies

To make the enemy invisible (quite why you would want to though is beyond us) press Right, Down, Right, X, Up, X, X, Y, Down, Right, Down, Right, X, Y at the Mode Selection screen

Night Levels

To play all the levels of the game at night-time press Up, Right, Down, Left, Up, X at the Mode Selection screen

Scope Always On

If you finish the game you'll get the option to have a scope permanently in the top left corner of the screen as in the arcade version of the game

Slave Zero

Invincibility

To become invincible press L+R+B on controller two in single-player mode

Gain Full Health And Ammunition

To recharge your health and to get a full complement of ammunition press L+R+X on controller two while playing in single-player mode

Toggle Enemy AI

To throw the enemy into confusion press L+R+A on controller two while playing in single-player mode

Sonic Adventure

Chaos and your VM

One of the most interesting things about Sonic Adventure are the Chaos, the little creatures you can breed, manipulate and download to your VM. The important thing to remember is that if you want a top-rating Chaos, you'll need to nurture and love him. Are you ready for some hand-held fun? Then follow us as we take you through the basic ins and outs of Chaos raising, VM style

Put It In, Take It Out

The first thing you'll need to know is how to actually download your Chaos into a VM. This is done through the Chaos Gardens and if you follow these simple steps, you'll have a miniature version of the Chaos in absolutely no time at all.

1. Make sure that you've got a VM inserted into the pad of your Dreamcast that has over 128 blocks of memory spare on it - that's virtually the whole thing! If there isn't enough room, you won't be able to put a Chaos onto the VM so you may have to delete some files to fit him in

2. Choose the Chaos you want to place inside the VM and pick him up with the Y button. Carry him over to the strange controller-shaped pedestal placed inside the Chaos Garden and stand on the large red button at the front. Now place your Chaos down so that it is sitting on the small tapstone in front of you

3. A screen will come up with the list of VM units that you can place the Chaos into - you will have a choice if more than one VM is inserted into any of the Dreamcast pads. Select the VM that you'd like to play with your Chaos in and press the A button.

4. After a brief period, the Chaos will disappear into the controller and then reappear on your VM - the controller pedestal will signal 'OK!' to show that the transfer was successful. You can now take out the VM and play with your little Chaos to your heart's content!

5. Removing a Chaos is a similar process - stand on the button of the pedestal without placing a Chaos on the tapstone and a lot of removable Chaos will appear if any exist. Simply choose the Chaos you want to remove and then he will appear in front of you shortly. Remember that this is the only way to get rid of Chaos information from a VM unit since it cannot be deleted by conventional means

Work, Rest And Play

Once you've placed the Chaos in your VM, it's time to start them on their quest! The object of the game is to help your Chaos develop its abilities as it makes its way along a route of quest stages - there are fifteen in total to choose from but only five are used in each quest. We will take you through exactly what ability each stage requires your Chaos to have - however, being proficient in that particular ability doesn't mean that the

stage of the quest will end any sooner. Along some of the routes he'll even get to meet one of Sonic's friends or maybe even the blue wonder himself!

Be My Guide

To start your Chaos off on his quest, get your VM into Game Mode by pressing the Mode button until an Ace of Spades appears and then hit the A button. Once the title screen appears, press the A and B buttons together and you're off on the adventure of a lifetime (for the Chaos, anyway). Most of the time, you can pretty much leave him to his own devices as he walks along but at certain points you'll need to help him out of a situation - a note will tell you that you have to do something. Here's a guide to what might happen to your little buddy

1. If your Chaos simply stalls, sits on a beach ball, falls asleep or gets scared by something on his travels, he just needs a little encouragement to help him along. Press the A button to get him moving again

2. If he finds a chest along the way you'll have to make a choice out of the three boxes to decide what he gets out of it. It could be good, it could be bad - until you make the choice, you just won't know!

3. A message may appear on the screen telling you that your Chaos is helping, has done well at something in particular or is developing properly. To get past this, just press the A button until it disappears

4. A picture of a Chaos standing at a signpost means that they have reached the end of their current quest stage and must now choose a direction to go in

You can either

make the choice for yourself from the two options on the screen or let the Chao choose for itself. Although it may sometimes make the wrong choice (if you let it).

5. If a large "F" symbol appears on the screen, it's time for a fight! When the fight begins, there will be a row of boxes along the bottom of the screen with the two fighting Chao above that as well as their relevant energy. Your Chao is always on the right. The Chao swinging his fist is the one taking a turn to attack. If it's your min you've got a chance to hit the other guy. All of the boxes will be blacked out with the exception of one - this number of clear boxes goes up according to the strength of the your Chao (if he has a strength of 200 or more then there will be two clear boxes; 400 makes three boxes clear and so on). To attack you must stop the moving cursor over the clear box, get it and you'll score a hit, but miss and you'll fall flat on your face. Chao take it in turns to attack and the last one who is standing is the winner!

Fancy A Game Of Cards?

One of the sure-fire ways of getting goodies is to play the Fruit Matching game. The game menu (brought up by pressing the A button). When you start the game, you'll get a brief glimpse of a screen containing six pairs of fruit in various positions. The screen will then go blank and you'll have three chances to try and match up the pairs by remembering where each of the different fruit were. It takes a bit of practice but if you can remember a couple of the fruits that look similar, you won't get confused between them. The fewer times you get it wrong, the better the prize you get, but mess up three times and you won't get anything except one very disappointed

Fruit And Veg

The main way to build up the abilities of your Chao inside the VM is to feed them different kinds of fruit, collected through playing the Fruit Matching game, winning fights or opening chests. Each fruit gives the Chao a boost in a particular field and the

more fruit you feed them, the better they become! Even better, any fruit left over after a quest is carried onto the next adventure and if you remove the Chao from the VM while it still owns fruit, then the fruit will pop out with it and you can then feed it to other Chao besides the one that you had in the VM. To feed your Chao a fruit, bring up the quest menu with the A button and then select the Items menu - this will give a list of fruits available that you can give to your friend. Use our guide to the different fruits in the game to help work out exactly what you need to feed your babies to make up for the areas that they're lacking in! The stipulations tell you if you need to perform a special function to get the fruit - all the fruits can be found randomly in chests also.

Gold Title Screen

After obtaining all 33B pictures from the Art Gallery, a new black and white title screen appears. Beat every mission in Mission Battle and it will have a gold tint.

New Title Screen

Beat the game with Inferno to get a new title screen.

Play As Cervantes

The boss of Soul Edge returns but this time as a regular contender, he is no longer under the influence of the demon swords and he wants them back. Sadly, to play as Cervantes finish the arcade mode with every character, this includes all the new ones that are unlocked. Once you have done that, Cervantes will become playable.

Play As Edge Master

You will first meet the Edge Master in the Mission Mode, to make him a playable character you must beat the game with all characters (including Cervantes). The Edge Master imitates other characters randomly, switching weapons every round. He also has his own version of everyone's weapon, though within a short time you will be able to tell immediately who he is. The Edge Master does have some exclusive moves of his own. If he's impersonating Kikik or Seung Mina the following move's available.

When Running: 9 or 3 or 9, 9, 9

Play As Inferno

In order to unlock Inferno you must first unlock all the other characters, stages, and bonuses. Select Xianghui and her third outfit. Play through and complete the game with her. Inferno will then be unlocked. Like the Edge Master, Inferno imitates other characters and switches moves every round. He does have some exclusive moves of his own however.

Though the availability of these moves depend on the character he is impersonating.

Another way of veng'ing which moves are available is to pause the game mid-

fight and check the characters move list. Inferno's moves will be added to the existing moves so search carefully.

Secret Dojo Mission

First finish all the missions, including all the extra missions (they appear after you finish the two Chaos stages). On the mission select screen, go to the eastern most map. Move your pointer over the Akira area. When you pass over the secret mission, you will hear the 'zip' noise you hear when you pass over any other mission, note that you will not be able to see it when you land on the location.

There are five missions in this location. Each stage has a random combination of conditions from the previous missions.

Secret Swamp Mission

First finish all the missions, including all the extra missions (they appear after you finish the two Chaos stages). On the mission select screen, go to the western most map. Move your pointer over the middle of the upper right area of the screen (somewhere around Poland). When you pass over the secret mission, you will hear the 'zip' noise you hear when you pass over any other mission; you will not be able to see it when you land on the location. There are two missions in this location. Each stage has a random combination of conditions from the previous missions.

Victory Poses

Each character has three different victory poses. To see each one, after winning a battle, press a, b, or c during the replay.

Soul Fighter

Access Cheat Code Screen

To access this, you must press Left on the D-pad and Y simultaneously when the Soul Fighter logo appears on the screen. Then go to the Options menu and exit it again. The next screen to appear will be the Cheat Code screen.

GAME

Welcome to the legendary DREAMCAST MAG directory, where you'll find every Dreamcast game listed. Don't go shopping without it...

It's our job to know games, and as this is the only Dreamcast magazine out there, this is the only place you will find a complete listing for all those Dreamcast games. So before you bother to even think about getting yourself a game you should read these seven pages carefully. Doing so will prevent you from wasting money.

Game Name	Publisher	Platform	Online	Useful	Fun	Great	Score	Value
1000000: American Pro Tracker	SEGA	✓	✓	✓	✓	✓	22	71%
We say: "Only there was more to the game it would be another instant SEGA classic." AW								
1000000: Peoples In The House	Eldev	✓	✓	✓	✓	✓	17	60%
We say: "A great game if you're a kid who's yet to savour the delights of real games but otherwise new to avoid - unless you've got a thing for Digs." AW								
1000000: Thunder	Blumax	✓	✓	✓	✓	✓	66	78%
We say: "Whether Thunder is generally an incredibly well-reviewed game, making it a total winner in our books." AW								
1000000: Evolution	Latex	✓	✓	✓	✓	✓	18	60%
We say: "Full and unimpaired racing game, slightly saved by its online capabilities. You'll be better off getting MSN or waiting for Daytona USA to come out." AW								
10 Minutes	SEGA	✓	✓	✓	✓	✓	29	70%
We say: "Slow and boring, with not even a hint of action. Like or extenuate." Not a bit like the rest (but, unless you are a Southampton fan) HA								
1000000: AirWings	Cave	✓	✓	✓	✓	✓	83	69%
We say: "As a flight simulator, AirWings is up there with the best of them, but as a game it lacks life. If you like a bit more action then stay away." AW								
1000000: 20 Arrows	Cave	✓	✓	✓	✓	✓	12	78%
We say: "For a simulation that prides itself on depth, it severely lets itself down on any detail that could actually be deemed 'fun.' HA								
1000000: Alone In The Dark: The New Nightmare	Infogrames	✓	✓	✓	✓	✓	23	60%
We say: "You'll lose many hours wandering through the game's obscure puzzles... and we mean lose." WU								
1000000: Armada	N/A	✓	✓	✓	✓	✓	65	71%
We say: "In spite of fine impressions, Armada offers the kind of depth some lacking in the majority of its contemporaries." ST								
1000000: Army Men: Sarge's Heroes	Whitney	✓	✓	✓	✓	✓	17	61%
We say: "As good as this might be, there's nothing in it that we haven't seen before and for that, it kinda sucks." AW								
1000000: Asim	Latex	✓	✓	✓	✓	✓	18	67%
We say: "It might not look fantastic but it's actually really good fun to play." AW								
1000000: Brawl-O	Virtic	✓	✓	✓	✓	✓	14	60%
We say: "Total crazy shoot-em-up with absolutely no points - you'll either totally love it or loathe it with a passion." MM								
1000000: Burn Stinger	Activision	✓	✓	✓	✓	✓	82	83%
We say: "It's a huge stinger's failure to really excite the player at any moment is its main problem." GN								
1000000: Break Head	SEGA	✓	✓	✓	✓	✓	82	81%
We say: "For a different kind of racing game that is going to hold a challenge in order to attract it, you can't go far wrong with Buggy Hunt." LW								
1000000: Break & Merge 4	Activision	✓	✓	✓	✓	✓	11	64%
We say: "A welcome addition to the puzzleers already out on Dreamcast." NC								
1000000: Buzz Lightyear Of Star Command	Activision	✓	✓	✓	✓	✓	16	66%
We say: "Even for a kids game this is way too short, although while it lacks it's moderately enjoyable to play." AW								
1000000: Castles Police 2000	Interplay	✓	✓	✓	✓	✓	12	60%
We say: "Surprisingly, it is not as bad as you might think... but it's still not a Dreamcast classic." MM								
1000000: Crown Sails	Capcom	✓	✓	✓	✓	✓	31	64%
We say: "Fun for a few minutes, but it's incredibly short gameplay ultimately lets it down." MM								
1000000: Cuphead	Yacht Interactive	✓	✓	✓	✓	✓	17	61%
We say: "This is the best 2D platformer available. As a pure arcade fighter, with none of the options of the best ones." CN								
1000000: Champion Of Surfer	The Learning Company	✓	✓	✓	✓	✓	18	60%
We say: "Unless you absolutely must own a surfing game, you should leave this one well alone. Really, you should." MM								
1000000: Chase N' Kick	Kick	✓	✓	✓	✓	✓	21	68%
We say: "If you've ever needed an example of how great graphics don't make a better game, this is it." MM								
1000000: Cliff's Law Stick	Activision	✓	✓	✓	✓	✓	83	81%
We say: "As party games go, Cliff's Law Stick is up there with the best of them and is a game enjoyed after a Gary and a few pints of lager." AW								
1000000: Clonix Man	Eldev	✓	✓	✓	✓	✓	17	72%
We say: "Not that much here for mature audiences, but younger kids and those to whom personality will seem to its undeniable charms." WU								
1000000: Coe One Knockout	SEGA	✓	✓	✓	✓	✓	16	60%
We say: "The hottest party game we've ever seen, with plenty under the hood for those who are 'hard' friends." WNU: MM								
1000000: Confidential Mission	SEGA	✓	✓	✓	✓	✓	22	69%
A worthy companion for the Dreamcast's other nightgun shooter." MM								
1000000: Counter Works	Kick	✓	✓	✓	✓	✓	23	66%
We say: "Good fun while it lasts but nowhere near enough to make you want to play all through the night." AW								
1000000: Crazy Taxi	SEGA	✓	✓	✓	✓	✓	65	69%
We say: "Crazy Taxi is a truly loaded adrenaline rush experience - it's pure concentrated fun, stuffed with one SEGA patented GD-ROM." ST								
1000000: Crazy Taxi 2	SEGA	✓	✓	✓	✓	✓	23	82%
We say: "Top visual, top music and top gameplay... but is good as the original? Not, well... MM								
1000000: Dave Mirra Freestyle BMX	Activision	✓	✓	✓	✓	✓	16	74%
We say: "It has gone with lots of potential that is sadly let down by a poor control system and annoying camera angles." MM								
1000000: Daytona USA (2001)	SEGA	✓	✓	✓	✓	✓	28	64%
A more than adequate perfect conversion that is guaranteed to impress fans of the aging original." WU								
1000000: Dead or Alive 2	Activision	✓	✓	✓	✓	✓	64	62%
We say: "DOD2 might not be the best (best) on-gen ever, but it is great fun to play and there's no quibbling that it looks absolutely stunning." AW								
1000000: Deadly Dinos	Konami	✓	✓	✓	✓	✓	66	70%
We say: "Searing through the dino has never been such an exhilarating experience - a must for Tom Cruise wannabes." AW								
1000000: Dead Frenzy	Dot Soft	✓	✓	✓	✓	✓	12	66%
We say: "It's not that bad to play once you get past the annoying FMV and moderately slow gameplay." MM								
1000000: Dino Crisis	Virgin	✓	✓	✓	✓	✓	19	79%
We say: "Direct PC conversions are always disappointing and this one's no exception. All we can ask is why Capcom... why?" MM								
1000000: Dinosaur	Dot Soft	✓	✓	✓	✓	✓	16	69%
We say: "It's not awful to play, but Dinosaur won't be keeping your attention for longer than a week at most." MM								
1000000: Donald Duck Duck Attack	Dot Soft	✓	✓	✓	✓	✓	17	71%
We say: "Perfect for the kiddies, but much too short-lived for anyone looking for a real game to get their teeth into." AW

Game Name	Punisher	Players	VM	Online	Useful Peripheral	Issue	Rating
Dragon Riders: Chronicle Of Pans We say: It's a hardly thrilling soul, as the plot unfolds along at the speed of a particularly lazy snail. AW	Unlabeled	1	✓	X	X	26	87%
Dragon's Blood We say: Some lovely visuals and fire touches don't go far enough to cover up what is essentially a rather repetitive game. Shame! MW	Unlabeled	1	X	X	X	18	85%
Dread World We say: "An absolute shocker of a bawling game that you shouldn't even attempt to go near... it's for your own safety." SP	Acclaim	2	✓	X	X	19	80%
Dynasty Cop 2 We say: Dynamite! This game may be, but it has a far too short a life, and leaves the player feeling a little cheated! MW	SEGA	2	✓	X	X	63	86%
Ease The Dolphin Delusion Of The Future We say: As soon as you see Ecco The Dolphin in action you'll be dribbling tears. What a group of bloopers at the annual. Max Vets T-Shirts tournament! MW	SEGA	1	X	X	X	68	81%
ECW Hardcore Revolution We say: There are so many emulators why you should rush out and get this? It might explain why Acclaim was reluctant to send us a review copy! MW	Acclaim	4	X	X	X	60	33%
Eco Adventure Pack If you need to be let you more time that this is water use, you're beyond help. Please, you leave us alone! MW	Acclaim	4	X	X	X	28	81%
ESPN International Track & Field We say: A second-rate knock-off of a version that appeared on an inferior console. MM	Konami	4	X	X	X	15	82%
European Super League We say: Certainly not a terrible game, but sadly it plunks itself down on the average goal in the Dreamcast's footballing pub! MW	Kirby	4	✓	X	ARCADE STICK	19	56%
Evil Dead: Rail To The Alps We say: Fame of the films may enjoy it for a while but others would do better to play Code Veronica again! SG	Unlabeled	1	✓	X	X	23	42%
Evolution We say: Evolution is great fun to play once you've allowed yourself to be astonished up by the archeological crowding thing! X	Unlabeled	1	✓	X	X	05	59%
Exhibition Of Speed We say: Frankly there's absolutely nothing to recommend this game to anyone other than those who enjoy comics! AW	Virgin	2	✓	X	X	18	18%
F1 Racing Championship We say: Whether you're an arcade racing fan or fancy more of a simulation, F1 Racing Championship offers both at a decent enough level! AW	Virgin System	2	✓	X	STEERING WHEEL	19	71%
F1 World Grand Prix We say: The speed of the cars and the way the scenery holds together is superb. The on-car display really shows off the Dreamcast's power! AW	Virgin System	2	✓	X	STEERING WHEEL	83	59%
F1 World Grand Prix 2 We say: The definitive F1 racer for Dreamcast! SC	Virgin System	2	✓	X	STEERING WHEEL	12	86%
Football 3DS Challenge We say: Have no doubt, this is the ultimate dining experience. Savor it and cherish it! AW	Acclaim	2	X	X	STEERING WHEEL	14	81%
Fighting Force 2 We say: Fighting Force 2 is fun to play and looks great. It's just not a game that you will be totally engrossed in and addicted to for long! AW	Elite Interactive	1	X	X	X	84	61%
Fighting Wings 2 We say: Pretty quite nice, but the package as a whole just doesn't live up to the high standards set by other DC fighters! CN	SEGA	1	✓	X	ARCADE STICK	28	86%
Flanagan Brothers We say: Nice idea, good for kids, but don't expect days and days of challenging gameplay! CC	SEGA	1	✓	✓	VERIFICATION PACK	26	71%
Fragsies 2 We say: Not too late in you might think, but you're not good enough to warrant more than a few play's worth of play! MW	Acclaim	4	X	X	X	17	80%
Fun Fighters We say: The closest thing to an Atari/Nintendo game that Dreamcast gamers are ever likely to find! SP	Acclaim	4	X	X	X	60	81%
Garfield Legends We say: It might not be the best-looking game ever but when you've got four friends crowded round it's fantastically satisfying fun to play! AW	Hudson	4	X	X	X	18	87%
Gladius Killers We say: "Full-fledged" never saw the light of day more like! CN	Smoking Gun	1	✓	X	KEYBOARD	28	78%
Goal Keeper We say: A good football management game with all the current English teams and a wide range of tactical options! RM	Virgin	2	X	X	ARCADE STICK	14	55%
Goal Keeper 2 We say: Not a pointless shoot-'em-up. It's the perfect more just for being in Exotic time around! MM	Unlabeled	1	✓	X	X	18	81%
GoldenEye 007 We say: A fresh approach to the genre that does a great job in showing other warlike adventures how it should be done! WJ	Sony	2	✓	X	STEERING WHEEL	26	86%
GT2 We say: GT2 is damned hard to enjoy, all the enhancements when you're driving on what looks like a track made out of a PlayStation! MW	Take 2 Interactive	2	X	X	X	66	81%
Gunlord 2 We say: Despite frantic attempts, this game fails to deliver in almost all departments! MM	Virgin	2	X	X	ARCADE STICK	18	81%
Hall-Of-Fame We say: "Full-fledged" never saw the light of day more like! CN	Mr. Nobody	8	X	X	VIVID IMAGINATION	15	81%
Headhunter We say: An excellent title that seamlessly blends together puzzle, adventure and all-out blazing action! SC	SEGA	1	✓	X	ARCADE STICK	28	82%
Heavy Metal Revolution We say: Poor level design, wobbly camera angles and wobbly gameplay ensure this title should be avoided! SC	SEGA	2	✓	X	ARCADE STICK	31	59%
Hudson's DeepSpace We say: It's a decent game, but whether it will appeal to the screen-crated console market remains to be seen! X	Take 2	1	X	X	X	12	82%
Houses Of The Dead 2, The We say: This is one of the titles worth buying a Dreamcast for, especially with the amazingly good lights to play with! MM	SEGA	1	X	X	LIGHTHOUSE	01	81%
Hydra Thunder We say: As a one-player game, there's perhaps not quite enough in the gameplay to have you drooling at the mouth! AW	Midway	2	X	X	X	81	86%
Iron Aces We say: It's not without its flaws, but the airbound combat is entertaining and at times in-depth. Not a must-buy, but worth a look! ST	Midway	2	X	X	X	82	88%
Jagged Power Battle We say: Great for four players, but might be worth a look if you're a simple platform-loving person at heart! PM	Midway	2	X	X	ARCADE STICK	16	85%
Jeremy McGrath Supercross 2000 We say: Don't go near this game if you want to retain your faith in the Dreamcast. Why? Because it will not pay you! AW	Acclaim	2	X	X	X	14	86%
Jet Set Radio We say: Plays this game as a near-heavenly experience. Justified this far on any system! AW	SEGA	1	X	X	X	15	82%
Jimmy White's 2-Cushion We say: If you really must play then you might as well pop down the local snooker hall and do the real thing. At least it'll get you out of the house! AW	Virgin	2	X	X	X	83	56%
John's Heavy Adventure We say: A true old school RPG in its own good - despite trying to do something original, it just ends up mediocre! MM	Virgin Interactive	2	X	X	X	87	77%

Game Name	Publisher	Platform	VM	Online	Visual Quality	Issue	Score
Present Justice We say: It's not that truly weird, so-called stop-making-second-best-choices-it's-a-conspiracy-theory-thing, AW	Psygnosis	2	X		ARCADIE STICK	16	81%
ProFootball Manager We say: Yes, it's only a partial game—but it's a partial game that we could happily sit and play all day long. Housheer	Sports Interactive	1	X			21	81%
Psychic Force 2012 We say: Graphically one away from being boring here but controls have been only mediocre on a PlayStation 3. ST	Acclaim	2	X	X	X	60	86%
Quake III Arena We say: Pretty much as great as we were expecting it to be, but with too many annoying niggles that stop us giving it a thumbs up. MM	SEGA	4	X	X	MOUSE & KEYBOARD	18	86%
Racing Simulator: Monaco Grand Prix We say: The controls can be a little too sensitive. However, you're as good as F1 with a Grand Prix. MM	SEGA	4	X		STEERING WHEEL	63	87%
Redneck Typing 2 We say: Typing game, you could say that's a lot of a trope, but in each of us and the game will appeal to that side of it.	Two 2	1	X	X	X	14	87%
Rebound Six We say: It may be old news but it's still a great idea for a game if you can get in to it. Unfortunately, the controls make the game too difficult. AW	Psygnosis	2	X		X	19	88%
Rayman 2: The Great Escape We say: Rayman 2 represents all that is great about the Dreamcast and is as good a game as you're going to find here. AW	Ubisoft	4	X		X	87	92%
Ready 2 Rumble Boxing: Round 2 We say: Make no mistake, Ready 2 Rumble is a game-crank release, but a right banger that will keep you in a good mood. ST	Midway	2	X	X	ARCADIE STICK	16	85%
Reel Fishing We say: A beautiful take on the on-face sport that plays like a dream. AW	Acclaim	2	X	X	X	18	85%
Resident Evil 2 We say: Nothing more than a cheap conversion of the PC version that fails to do justice to the Dreamcast. AW	Psygnosis	1	X	X	X	86	73%
Resident Evil 3: Nemesis We say: Unless you're a complete Resident Evil nut who has to own them all, this really isn't worth handing over the cash for. MM	Psygnosis	1	X	X	X	17	86%
Resident Evil Code: Veronica We say: Resident Evil fans will go mental about this game, the whole affair looks amazing and at times the actual score the life out of you. MM	Ubisoft	2	X		X	63	79%
Red Dog We say: The game has some really smart graphics with realistic scenery and lightning fast speeds along with some great gameplay. AW	SEGA	4	X		X	82	71%
Raz We say: As a multiplayer it's fun, if nothing particularly outstanding, but the overall package is a winner. BK	Big Red Interactive	1	X		VIBRATION PACK	31	83%
Reckless We say: An original first step into a whole new genre. It doesn't quite work as well as it could. SJ	THQ	4	X		STEERING WHEEL	18	80%
Rings of Power We say: This is by far and away the worst driving game to be released on Dreamcast and frankly, it's an embarrassment to the power of the console. AW	Psygnosis	4	X	X	X	21	77%
Rings of Power We say: Much better than the last Ring of Power, but still not quite up to the excellence that the PC version achieved. MS	SEGA	2	X	X	KEYBOARD	16	82%
Road to Rome We say: It's totally bonkers and the best fun you'll have with a pair of maracas and a Dreamcast this Christmas. AW	Midway	4	X	X	STEERING WHEEL	13	71%
Road to Rome 2048 We say: For all the promise that Road 2048 shows, it doesn't live up to expectations. AW	SEGA	1	X	X	X	83	86%
SEGA Bass Fishing We say: SEGA Bass Fishing is a fantastic game and whatever your attitude to the sport of fishing, you can on love this game. AW	SEGA	2	X	X	X	10	86%
SEGA Extreme Sports We say: It's a great fun but the lack of a good multiplayer mode cuts the life of this one in half. MM	SEGA	2	X	X	STEERING WHEEL	16	89%
SEGA Rally 2 We say: An incredibly well-tuned game that will keep you driving enthusiastically for a long, long time. AW	SEGA	4	X	X	STEERING WHEEL	81	81%
SEGA Rally 2 We say: The arcade action is certainly unrivaled and it is a must-buy for anyone looking for an intro into the racing genre. PH	SEGA	4	X	X	X	84	82%
SEGA WorldWide Soccer 2000 We say: Not as good as the first SEGA Soccer, although it is the best by a mile. It has to be said, it's a really sub-standard sports game. It's worth it to have it. AW	SEGA	4	X	X	X	80	80%
SEGA WorldWide Soccer: Euro Edition We say: Not as good as the first SEGA Soccer, although it is the best by a mile. It has to be said, it's a really sub-standard sports game. It's worth it to have it. AW	SEGA	4	X	X	X	80	80%
Shadow Rex We say: If you have a trigger finger and a penchant for killing everything in sight then this will fulfil your fantasies and your nightmares. AW	Acclaim	1	X	X	X	88	86%
Shogun We say: Stunning to look at and great for RPG fans, but certainly not for everyone. CN	SEGA	1	X	X	ARCADIE STICK	18	85%
Shogun II We say: Let this be your DC's last great game—you don't play this epic, you experience it. A must-play whether you test Shogun or not. CO	SEGA	1	X	X	X	18	82%

No! It's just a way that makes spending an afternoon watching some fish fingers seem interesting. 'NO! Yes! Highway Challenge	Cave	2	X	X	STEERING WHEEL	13	64%
No! Says Highway Challenge isn't one of the best Dreamcast racing games but a close loss to NASCAR. 'AW! Yes! Highway Challenge 2	UMI Soft	2	X	X	STEERING WHEEL	17	85%
No! Although apparently better than the original, this is a game that just doesn't seem to 'right the blue check' on the Yes! Total Destruction	Edios	1	X	X		17	70%
No! Looks like the Emperor is absolutely narked Sony Lita, but it's time to stop adoring and start having babies. 'W! Yes! The Last Servitude	Edios	1	X	X		17	72%
No! Thanks to the power of the Dreamcast, every stage of East European looks jaw-droppingly amazing. 'MM! Yes! Tony Hawk's Pro Skater 2	Ashtronix	2	X	X		17	86%
No! Without a doubt the finest skateboarding game in existence - until Tony Hawk's 3 comes out! 'MM! Yes! Tony Hawk's Skateboarding	Cave	4	X	X		18	84%
No! It's an excellent purchase for any Dreamcast owner. We just can't remember how great this game was. 'MM! Yes! The Commander	SEGA	4	X	X		18	86%
No! The game is a dream to play, with very little slow-down and a graphics engine which is solid - producing few glitches. 'W! Yes! The Story 2	Accurate	1	X	X	ARCADE STICK	18	72%
No! They can't reject, but everyone else should try before they buy. 'W! Yes! The Style	Accurate	2	X	X		18	78%
No! 'Rock Style' is a great visual and a bit of a showcase for the Dreamcast, but as a game it's good but not great. 'S! Yes! UEFA Soccer Dream	SEGA	4	X	X	ARCADE STICK	18	79%
No! It's third time lucky for Soccer Dream as this is by far and away the best of the football games they've done. 'AW! Yes! UEFA Striker	Intergram	2	X	X		18	67%
No! It's very much from the old F3A pick-up-and-play mould, but for the hard enthusiasts. It all feels a bit too watered-down. 'RS Yes! The	Cave	1	X	X		14	62%
No! A rare port of a network playing game, which is why this Dreamcast import isn't as well known. 'W! Yes! The	Intergram	4	X	X	KEYBOARD & MOUSE	22	87%
No! Great game but the missing online play means that Soccer 97's just open. 'MM! Yes! The	Edios	1	X	X		14	48%
No! Good clearly this is the worst game of its genre on the Dreamcast, not to mention an embarrassment. 'W! Yes! The	Intergram	4	X	X	STEERING WHEEL	18	88%
No! It's a very decent game, quite up to the same standards as SEGA's other 2D titles, although it's a very good game. 'W! Yes! The	Ashtronix	4	X	X		14	78%
No! This isn't your run of the mill racing game or your typical sports em up, but something completely valuable and unique. 'AW! Yes! The	SEGA	2	X	X		14	88%
No! It's a solid perfect representation of a great game. 'W! Yes! The	SEGA	2	X	X		18	78%
No! 'Virtua Striker' is an excellent arcade-style soccer game. It's great for a laugh and it certainly shows the port. 'S! Yes! The	Intergram	4	X	X	STEERING WHEEL	18	88%
No! It's a top hat game that makes a change from all the typical, boring games around it. It's really worth a try. 'W! Yes! The	Edios	4	X	X	STEERING WHEEL	12	88%
No! As much as 'WORLD' and 'W' tries to capture the fun and make of other sports, racing games, it's ultimately hard to do so. 'W! Yes! The	Edios	2	X	X		18	71%
No! 'Puzzle Pass' will find themselves to cerebral come-munching nirvana. 'S! Yes! The	Backstar	2	X	X		17	88%
No! 'Ward Mead' amounts to no more than a dull, unimaginative, shameful waste of GD-ROM technology. 'S! Yes! The	Ward Mead	4	X	X		18	73%
No! As even Tom 17 has delivered the goods, Womonga Animations is the first and most enjoyable of the series. 'W! Yes! The	Vision	4	X	X	ARCADE STICK	18	88%
No! You are even taught into online games as their best, you'll want to get hold of this right now. 'MM! Yes! The	Accurate	4	X	X		13	81%
No! If you want a game that you can use as a lesson when you're away from your Dreamcast - this is it. 'W! Yes! The	Accurate	4	X	X	ARCADE STICK	13	81%
No! 'WFF Royal Rumble' is a great representation of the crazy world of the WFF and should find favour with fans everywhere. 'W! Yes! The	Accurate	4	X	X	STEERING WHEEL	18	78%
No! It's a nice looking, if a little hackneyed, driving game offering everything but the one thing we all want: a lot of success racing round. 'S! Yes! The	SEGA	4	X	X	ARCADE STICK	14	54%
No! It's a good, but not great, we were hoping for so much more. We like the game, but not more than a few days. 'W! Yes! The	SEGA	4	X	X		12	84%
No! An exceptional piece of programming that pushes the purchase of a Dreamcast. 'PM! Yes! The	Edios	4	X	X		14	88%
No! 'Zombie Revenge' of the name will ensure its success, but in the long run a lot of people are going to be disappointed. 'CN Yes! The	SEGA	2	X	X		15	88%

No! 'Zombie Revenge' proves once and for all that the Dreamcast really is just an arcade machine in disguise. 'AW!
